

Daniel Angelucci

Chief Technology Officer, Asia

Daniel Angelucci is the Chief Technology Officer of DXC Technology for Asia. As Regional CTO, Daniel is responsible for promoting DXC's technology story in the region as well as helping to shape the future technology direction of the organization. Daniel held a similar role at Computer Sciences Corporation (CSC) – which merged with Hewlett Packard's Enterprise Services business to create DXC Technology in April 2017.

Prior to CSC, he served as a Senior Director in the engineering team at Visa Worldwide, a Senior Consultant at Verizon and spent many years in the global architecture team at DHL. Daniel has been responsible for building and implementing IT strategies for cloud services, mobility, social media and analytics for large global players in financial services, telecommunications and logistics. He brings a keen understanding of technology architecture as well as the financial side of IT strategy and delivery.

Daniel was born and raised in the United States, but now resides with his family in Singapore. Daniel is a graduate of the University of Chicago with a degree in philosophy.
