

DXC Fruition ITAM Expedition

The IT Asset Management (ITAM) Expedition Suite provides a prescriptive, accelerated path to implementing a mature ITAM program by utilizing ServiceNow's asset management and related modules.

Benefits

- Ability to execute bulk hardware refreshes, including automated transfer of Software Entitlements and asset reclamation
- Integrated Software Audit response enables you to coordinate resources, reduce churn, and document outcomes
- Role-based ability for asset managers to perform bulk imports to manage data more efficiently
- Automated updates within asset workflows save time, reduce clicks, and increase data accuracy within the AMDB/CMDB
- Increase speed-to-value with a concise set of deployment activities

ITAM Expedition is a suite of four unique products - Base, Ascent, Crest, Summit - that can be implemented individually or bundled to address your organization's current program needs and scope. Each product level is designed to be a prescriptive solution that, similar to DXC Technology's other accelerators, requires minimal customization while maintaining a best-practice focus.

ITAM Expedition allows organizations to maximize the value from the program while reducing the administrative effort to maintain data accuracy. The automation introduced throughout the product suite not only drives accuracy but also leads to cost savings by increasing efficiency of both resources and asset inventory.
