Driving Innovation. Delivering Results.

DXC Technology
Corporate Overview
About DXC Technology

The world’s leading companies rely on DXC Technology to run their mission-critical systems and operations while modernizing IT, optimizing data architectures and ensuring security and scalability across public, private and hybrid clouds.

With decades of experience driving innovation, our customers trust us to deploy our Enterprise Technology Stack to deliver new levels of performance, competitiveness and customer experience.
Unlock value across your organization

- Organizations want to modernize their IT and analytics capabilities to unlock new insights, create revenue and drive efficiencies.
- DXC makes customer information more visible and actionable across functions.
- Our Enterprise Technology Stack allows customers to drive business transformation and accelerate growth.
- We help customers determine where workloads are best suited — and how to harvest data to generate meaningful insights.
Our strategy

- The Enterprise Technology Stack aligns with the way enterprises view their technology journey.
- It begins with IT outsourcing (ITO) as the foundation.
- The next level provides cloud capabilities with security services, which go hand-in-hand.
- Enterprise workloads are rationalized, modernized and managed in the applications layer.
- Analytics capabilities harvest data; engineering services generate insights that move businesses forward.
- Advisory services guide enterprises from strategy to implementation.
- We deliver the technology stack in the context of deep industry expertise by providing integrated industry solutions.

Business results

Accelerated **BMW Group’s** ability to collect and manage test data on a massive scale, simplifying analysis and reducing time to develop fully autonomous vehicles.

Modernized operations for **DB Cargo**, yielding significant savings through an integrated rail cargo management solution supporting 12 EU countries.

Enabled **Tops Markets** to adapt to changing customer tastes, expanding online services and business analytics to support digital transformation.

Helped **Molson Coors** fully integrate legacy and SAP applications and realize $35 million in IT savings over 3 years.

Elevated **SAS Airlines’** ability to deliver exceptional customer experiences via an advanced analytics platform.

Implemented an electronic patient records system for **Royal Papworth Hospital NHS Foundation Trust** to improve patient care and the foundation for transformation.

Supported **Campbell Soup Company’s** operations across infrastructure, applications and security, with an IT foundation that enables it to focus on value-added activities.

Provided **Uniper** with a digital infrastructure to quickly introduce products and services, manage hundreds of suppliers and respond to turbulent markets.

Created an intelligent digital workplace for **Saab Group** to enable employees, suppliers and partners to collaborate globally and maintain high levels of security — while saving $4 million a year.
