Offices of lawyers	\$7M+	27

4,000 projects delivered and experience with over 1,000 clients leveraged in the data transformation process to ensure quality, accuracy and consistency of spend and procurement data

Why DXC Spend Analytics? 3 good reasons

1

Flexible and scalable

Our clients get a true partnership, which produces procurement analytics focused on their strategic objectives and priorities.

2

Best outcome from available data

DXC uses the most relevant combination of data science, external data sources, machine learning and a private research crowd to deliver the best result from the client's own and third-party data sources.

3

Audience-relevant visualizations

From pre-built dashboards to direct API access to the raw data, and a range of options in between, we deliver visualizations that are centralized, transparent and accessible to all user audiences.

SUCCESSSES

DXC Spend Analytics
