

# Take control of your information

## DXC Archiving Services — an information governance service

Manage retention and disposition of your information to comply with changing regulations and gain valuable insight

### Benefits

- Achieve compliance with retention and disposition regulations, enable discovery and legal hold, and protect data privacy.
- Leverage intellectual capital to enable business advantages while protecting valuable information assets.
- Improve productivity with efficient information access and fast, responsive, and available applications.
- Reduce storage costs with tiered storage, footprint reduction, defensible disposition, and legacy application de-commissioning.

DXC Technology offers you secure, extended life-cycle management of your business data. DXC Archiving Services are based on market-leading software, and include expertise and services to pick up your data at the source. These cost-effective, end-to-end services enable you to reduce data storage and compliance costs, retire legacy applications, leverage the intellectual capital of inactive data, ensure compliance with changing regulations, and protect valuable information assets.

DXC Archiving Services support a wide range of business outcomes:

- Archiving of email and instant messages for operational or compliance purposes
- Archiving of business files on file and print servers, in Microsoft® SharePoint and in other document repositories
- Archiving of managed output and input
- Application decommissioning by archiving the transaction data from SAP and non-SAP business applications in business context

- Application optimization by offloading data of inactive transactions from production databases to an archive, thereby unburdening the production application

DXC Archiving Services are delivered and supported from DXC data centers, on your premises, or in a private utility or cloud model with no capital expenditures needed.

### Value proposition

Organizations feel squeezed among rising data storage spending, compliance costs, and increasing government regulations. It's a complex task to manage the retention and disposition of a rapidly growing volume and variety of information, to mitigate risk, to avoid cost explosion, and to maintain service levels for key repositories. DXC Archiving Services enable customers to take control of their information, manage it as a business asset, and increase competitive advantage.

- We enabled customers to shut down hundreds of legacy applications or an entire legacy mainframe, resulting in annual cost savings of several million dollars per mainframe, or \$100,000+ per application.

- Our services allow customers to take control of business files and messages, freeing up large quantities of expensive storage, and enabling customers to actively manage the disposition of outdated content. For one \$15 billion manufacturing company, this resulted not only in storage savings of roughly 200TB, but also reduced litigation expenses.
- DXC helped a customer that experienced monthly data growth in excess of 1TB for a business-critical application to stabilize the application at approximately 4TB, ensuring employee productivity and availability of critical business functions.

## Client benefits

Increase your competitive advantage by managing information assets according to business value, cost, and risk. Start to manage retention and disposition of a rapidly growing volume and variety of information, to mitigate risk, avoid cost explosion, and maintain service levels. Gain these benefits from DXC Archiving Services:

- Compliance, simplified legal discovery, and reduced risk
- Protected valuable information assets and personal identifiable information
- Significant cost savings for retired applications and mainframes
- Efficient information access
- Maintained application service levels and employee productivity
- Structured data stored in open data format: no vendor lock-in
- No need to acquire or maintain skilled resources to secure continued access to legacy data

## Industry applications

Examples of business outcomes from archiving and data management (A&DM) services in different industries around the world include:

- Investment bank archiving activities are compliant with Dodd-Frank Act and SEC 17a-4.
- Governments digitize paper archives to accelerate decision making and improve quality.
- Pharmaceutical companies archive in compliance with FDA 21 CFR Part 11 and EudraLex 4 Annex 11.
- Crop protection manufacturers archive dossiers in compliance with CADDY.
- Legacy application decommissioning is needed in all industries experiencing mergers, acquisitions and divestitures.

## Why DXC

**One archive for all data** — Whether the material includes messages, office files, data from SAP or non-SAP systems, or other sources, a comprehensive archive for all data simplifies operations, avoids compliance risks, and augments the value of archived information by the ability to correlate it.

**Flexibility** — We offer many options to adapt an archive to your service needs, providing the flexibility to access archived data for almost any purpose. And our flexible deployment options include on-premises and as-a-service delivery.

## About DXC Technology

DXC Technology (NYSE: DXC) is the world's leading independent, end-to-end IT services company, helping clients harness the power of innovation to thrive on change. Created by the merger of CSC and the Enterprise Services business of Hewlett Packard Enterprise, DXC Technology serves nearly 6,000 private and public sector clients across 70 countries. The company's technology independence, global talent and extensive partner network combine to deliver powerful next-generation IT services and solutions. DXC Technology is recognized among the best corporate citizens globally. For more information, visit [www.dxc.technology](http://www.dxc.technology).

**DXC expertise** — Skilled DXC archiving experts help clients analyze data sources, set up and execute archiving in the best way for the data, to effectively manage large numbers of concurrent archiving projects, and skillfully use the archive to derive additional business value from stored data.

**Market-leading software** — DXC partners with software vendors whose solutions Gartner and other analysts continue to place in the leader's quadrant in multiple areas relevant to archiving.

**Global delivery capability** — With 50+ data centers, 3,500 A&DM consultants, 7 global delivery centers on 5 continents, and 25+ years of experience, DXC truly has a global reach.

## Next steps

Start to take control of your information and to treat information as an asset.

- Ask for an advisory session to explore your needs and requirements.
- Define the business challenge and expected outcome.
- Assess the various information sources applicable to your business case.
- Prioritize actions and data sources according to compliance and business benefits.
