

DXC Action Analytics: Real-time Management Analytics

Streamlined financial analytics as you need it

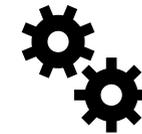

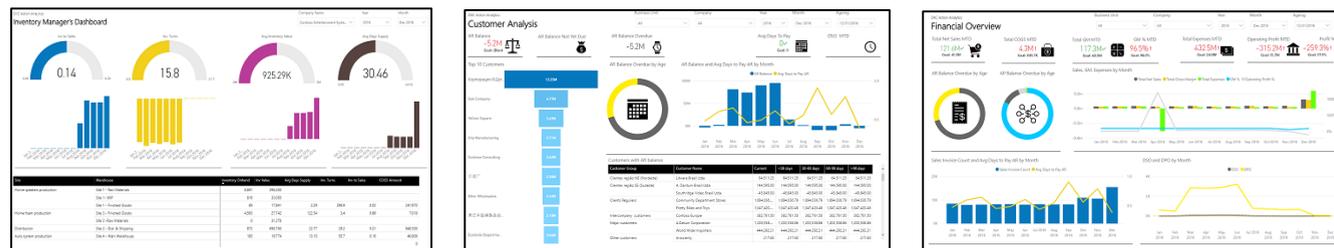

A compelling reason for action

In these unprecedented times, many organisations need to adapt quickly to get across their organisation's financial position and manage the impact of economic and social change we are experiencing.

Unfortunately many businesses have a delay in reporting their financial position due to system and data availability. It's no longer relevant to make decisions using data that is days to weeks old when hours make a difference.

DXC Action Analytics – Real-time Management Analytics offers a solution to streamline and deliver interactive access to your finance data so you can move forward with the right data, at the right time.

Interactive 'slice & dice' on finance data in a week

Action your latest financial data

DXC Action Analytics – Real-time Management Analytics is a DXC hosted, streamlined version of DXC Action Analytics with a focus on your financial position including:

- Cashflow reporting
- AR & AP
- Balance sheet
- Profit & Loss
- Inventory / stock on-hand

A 'just in time' solution for financial analysis:

- Real time data feeds (depending on source)
- Includes Cloud Licensing, cloud hosting, setup, data storage (excluding any on-premise & customer costs)
- Other source ERP/Finance systems - TBC based on integration complexity

Typical investment:

- 6 month fixed-term
- Standard implementation is 5 days services for AX, D365 & NAV customers
