

Cloud migration and transformation services for AWS

DXC Technology is uniquely positioned to support customers migration and transformation to Amazon Web Services (AWS). We combine extensive infrastructure, applications and industry knowledge with deep AWS expertise across our regional AWS Practice and Global Cloud Centre of Excellence. Whether migrating from legacy Windows workloads, aging Unix systems, exiting a data centre or performing mainframe modernisation; DXC can help you migrate and transform to allow your business to take advantage of the cloud

DXC's migration capabilities

- Dedicated DXC AWS Practice in region
- Global AWS Centre of Excellence
- Industry hardened discovery and assessment process
- Multiple migration paths to ensure correct treatment per application
- AWS Migration Acceleration Program (MAP) Partner
- VMware Cloud (VMC) partner
- Cloudhouse partner
- Management services to run and continually optimise

DXC Cloud Migration for AWS

DXC Cloud Migration and Transformation Services for AWS provide discovery, assessment, sprint-based migration waves and ongoing optimisation. DXC migrates more than 60,000 workloads per year applying best practice methodologies to each application migration and transformation.

DXC Cloud Migration and Transformation Services for AWS are delivered in the following phases:

Discover

Machine-based discovery merged with existing digital data and human input combined to provide a complete view of your application landscape and dependencies.

Migrate

DXC's migration engine accelerates delivery through our knowledgebase of migration treatments and our sprint-

configured migration squads. Covering preparation, application treatment, data migration and UAT for completion.

Run

DXC Managed Services for AWS provides 24x7 support; account setup; AWS and operating system management and security; DevOps automation, consolidated on-demand billing; granular reporting supporting chargeback to business units and application owners. Continuous cost/usage optimisation and best practice recommendations.

Any source, right approach

DXC's experience means we can provide the right approach for any application regardless of the source.

Our approach leverages our knowledge base built on experience to;

- Rehost
- Re-platform
- Rearchitect
- Retire
- Repurchase
- Refactor

DXC has migration and transformation treatments for:

- **Legacy Windows:** Applications running on Windows 2003 and 2008 can be migrated with no code change to AWS leveraging Cloudhouse technology.
- **Linux/Windows VM:** Existing VM fleets regardless of hypervisor are migrated in waves to AWS using the approaches listed above.
- **Unix:** Unix systems can be freed from aging hardware to run in the cloud through Unix-to-Linux methodologies.

- **Mainframe modernisation** follows a rehost or rearchitect approach to ensure successful migration to the cloud. Established toolsets such as Micro Focus and Blu Age ensure mainframe applications run securely and reliably in the cloud.

Transformation is ongoing

Migration is a keystone to digital transformation. DXC can support you post-migration to ensure you fully enjoy the benefits of public cloud.

DXC Managed Services for AWS

Ongoing management, automation, and optimisation for achieving business goals, reducing costs, utilising new capabilities while maintaining security and compliance.

DXC's managed services take-on the undifferentiated heavy-lifting to free your team to focus on high-value activities.

Client experience centres

Highly scalable and cost-effective digital contact centres based on Amazon Connect.

DXC's Partner Network

Successful migrations and transformations require the right tools for the job. DXC's partner network ensures outcomes are achieved while maintaining velocity and assurance.

Our Partner Network includes:

- AWS Premier Partner
- AWS Migration Acceleration Program (MAP) Partner
- VMware Cloud (VMC) partner
- Cloudhouse
- Micro Focus
- Blu Age
- Microsoft
- SAP (DXC Oxygen)
- Oracle (DXC RedRock)
- Salesforce (System Partners)
- ServiceNow (DXC Fruition)
