

DXC 2021 Graduate Program

Our Graduate Program is designed for talented, passionate graduates who are looking to join an agile world leader and are ready to deliver the best solutions to transform businesses in the new digital world through the power of technology.

Choose your pathway

DXC offers a variety of graduate opportunities across a number of role types that are designed to match your tertiary background, skillsets and career aspirations. We are determined to help you find what you truly love, learn things you never thought you would, and develop skills beyond “just I.T” to excel in your role and all aspects of our business.

Application Developer

- As an Application Developer, you will apply your specialised knowledge to conceptualise, design, develop, unit-test, configure, and implement portions of new or enhanced (upgrades or conversions) business and technical software solutions through application of appropriate standard software development life cycle methodologies and processes. In this role, you will interact with the Client and project roles (e.g. Project Manager, Business Analyst, Data Engineer) as required, to gain an understanding of the business environment, technical context, and organizational strategic direction. You will define scope, plans, and deliverables for assigned components and work to understand and use the appropriate tools to analyse, identify, and resolve business and/or technical problems. You will also be required to apply metrics to monitor performance and measure key project parameters, prepare system documentation, conform to security and quality standards and stay current on emerging tools, techniques, and technologies.

Business Analyst

- As a Business Analyst, you will work collaboratively with clients and stakeholders - both internal and external to DXC - to research and elicit, analyse, validate and document business requirements, and to ensure that those requirements clearly reflect true business needs, correctly representing all stakeholders. You will translate business needs into system/application requirements and project components to help determine solutions to business problems. You will also assist team members in producing functional requirements for tool development, proactively identify and manage changes to requirements and identify risks for DXC's clients and effectively manage the client's expectations. You will also be required to, apply your industry and information technology expertise to support proposals, feasibility studies, implementations and new business development.

Business Operations and Finance

- As part of working within Business Operations and Finance, you will work collaboratively with a range of internal stakeholders including finance, sales, delivery and with the Senior Leadership Team to provide a range of business support and governance services including strategy and planning, supporting the management review, cadence and risk management. This role allows you to work on improving business analytics and providing insights utilising data from monthly reports and internal requirements. This role provides a unique opportunity to interact with and understand all parts of the business and contribute to projects which have significant business impact.

Business Consulting

- As a Business Consultant, you will provide general business consulting services and play a key support role in creating and delivering business solutions for clients; working in conjunction with more experienced company business staff to begin building knowledge and experience in the areas of business process design, workshop facilitation, analytic assessments, and industry-specific practices and requirements. You will also take part in work groups, work sessions and interviews with business and technical representatives occasionally as an observer but more often as an active participant.

Cyber Security

- As part of working within Cyber Security, you will assist with auditing computer systems to ensure they are operating securely and that data is protected from both internal and external attack. You will support security assessments to ensure adherence to customer specific security policy, procedures and industry standards, monitor, evaluate, and assist with the maintenance of assigned security systems in accordance with industry best practices to safeguard internal information systems and databases and also assist with the review and definition of security requirements. You will be required to provide support for system reviews to determine if they are designed to comply with established standards and participate in the investigation of security violations and breaches whilst preparing reports on intrusions as needed. Additionally, you will review firewall logs across an assigned area and assist with configuration of firewalls, intrusion detection systems, and other network security devices across designated areas.

opportunities and build sales capability. You are also required to maintain ownership of assigned tasks and opportunities and perform related pipeline hygiene activities.

- In Marketing, you will work collaboratively with the marketing and communications team. This includes the coordination of client invites to hospitality and marketing events plus assisting with end to end execution of marketing campaigns and events from invitations through to lead management and post activity follow-up leveraging Marketo CRM system. You will coordinate and upload content onto the DXC website plus support a SEO and SEM strategy to increase page views and performance of the DXC.technology website. You are also required to assist with all aspects of content development including client case studies and thought leadership including publishing content on various marketing channels and assist with creative components as required, e.g. collateral, videos, etc. Liaising with agencies, 3rd party and other internal departments to coordinate marketing activities and client touches and improve the overall brand experience. You may also, assist with marketing operations including budget management, updating of the marketing calendar for internal communication and post campaign metrics, reporting and reviews.

Delivery

- As part of working in Delivery, you will support the delivery of applications according to agreed upon business solution goals and objectives whilst coordinating activities of functional areas with department account leads to ensure that business solution requirements are met. You will also, assist in interpreting demand forecasts and work with team members to provide high quality specifications for complete end-to-end project delivery. Additional responsibilities include maintaining records of account specific application problems and assisting in prioritizing work requests, working closely with senior team members in coordinating communications between lines of service (LOS) and clients to ensure that integration of new, enhanced and existing applications meet client specifications, and assisting in identifying and researching application improvements to increase customer and stakeholder satisfaction.

Project Management

- As a graduate in project management, you will gain experience in project management office functions, project control functions and project management. You will work in conjunction with more experienced project staff to begin building knowledge and experience in areas such as scheduling, financial management, delivery assurance, reporting, project governance and stakeholder management. You will work on small projects supporting project managers and well as having the opportunity to lead small projects to develop project management skills.

Sales and Marketing

- In Sales, you will work collaboratively with clients and stakeholders, both external and internal to the company, to identify and develop opportunities; research, analyse and validate suitability of DXC offerings to satisfy client needs and ensure those offerings clearly reflect true business needs, correctly representing all stakeholders. You will translate business needs into commercial propositions and support client executives and client partners to develop and present value propositions, proposals and presentations. You will also work closely with sales leaders and client partners to successfully pursue

Support

- The Support Consultant will be accountable for providing our customers with a high quality service built upon personal experience, demonstrated accomplishments, sophisticated knowledge, advanced skills, and a passion for the delivery of best practice outcomes. The successful applicant will be responsible for delivering quality customer support services encompassing; incident resolution, defect management and other support and maintenance related client interactions across DXC's established Products and Solutions

Systems Engineering

- The ideal System Engineer candidate will assist in the design, and development of, basic integrated solutions through tools, processes and procedures to facilitate the cost effective delivery of services or fielding of successful products. You will perform, under supervision, basic testing and integration, maintenance and escalated problem resolution of computer environments such as embedded systems, desktop, mainframe, midrange, servers and other peripherals and other systems as appropriate.

Technical Consulting

- The Technical Consultant will provide general technical consulting services and play a key support role in creating and delivering technical solutions for clients; working in conjunction with more experienced company technical staff to begin building knowledge and experience in the areas of technical software, application delivery tools, testing strategies and packaged applications. You will take part in work groups, work sessions and interviews with business and technical representatives occasionally as an observer but more often as an active participant.
