

# DXC Eclipse Power Platform Advisory

## Best Practice, Governance & building your own Power Platform Centre of Excellence

### A compelling reason for action

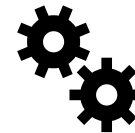

The Power Platform offers a great opportunity for ‘the Citizen Developer’ within your organisation to take app development into their own hands, helping you to boost productivity, automate processes and allow easier access to data.

As with any development project – applying solid IT governance and process is essential to ensure your long term project success and reduce any unnecessary project risk.

DXC offers an Advisory Service to help you establish your own Centre of Excellence with the right governance framework and approach. This will allow your Power Platform app development to grow within the right guidance and support, tailored for your specific business needs.

**Get off to the right start with a professional implementation for your Power Platform Centre of Excellence**

### Best practice for your Power Platform Centre of Excellence

#### Take the right approach with guidance from Power Platform experts:

- Learn how to ensure the right problem is being solved with appropriate effort to value
- Discover how to implement security and protect your valuable data
- Determine what category of Apps to build from productivity to online Apps to suit your business need
- Outline your ongoing App support, management and deployment models.

#### On-line, consultation and advice delivered via Teams with:

- Consulting and advice on how to adapt to your environment, where additional enhancements can be quoted if applicable.
- Installation of the Microsoft CoE Starter Kit
- DXC Enhancements for the Microsoft Starter Kit
- Delivery of User Guide and Training on the Microsoft Starter Kit features.
