

DXC Managed Multicloud Services powered by VMware

DXC Managed Multicloud Services powered by VMware accelerates the deployment of a complete managed virtual environment in highly available and secure private and public clouds to help organizations reduce IT operating costs, deploy applications faster, and shorten time to market for new products and services.

Business case

“Going digital” can be a compelling event. Enterprises performing transformations are the leading factor driving public cloud engagement and adoption. Market pressures, advances in technology and new business models are compelling organizations to become more agile, in a manner that reduces barriers and helps them respond faster to the changing marketplace. From a business perspective, organizations are focusing on innovation, agility and automation to shorten time to value.

Enterprises must evolve legacy technology systems and applications to survive. The cloud is providing the scale and speed needed to deliver transformation, and multiple clouds are the new reality. Chief information officers have to balance business demands and technology requirements. IT organizations want to deploy and provision resources that increase speed, reduce costs, are easy to use and fit for purpose; however, technology requires a stable delivery infrastructure that is secure, integrates with other business applications and is scalable.

DXC Managed Multicloud Services powered by VMware accelerates the deployment of a complete managed virtual environment in highly available and secure private and public clouds to help organizations reduce IT operating costs, deploy applications faster, and shorten time to market for new products and services. This managed virtual environment comprises compute, storage and network infrastructure as well as applications. It provides a consistent solution to manage services on any cloud, enabling a flexible, cloud-agnostic strategy. It allows companies to protect and enhance their VMware investments and establish a digital foundation for the future.

Key benefits

- **Speed:** Rapid deployment, agile capacity, consistent infrastructure delivered as a service
- **Cost reduction:** Protect existing investment, ensure operational consistency, avoid application refactoring cost
- **Risk reduction:** Consistent infrastructure delivered as a service, operational consistency, consistent security
- **Flexibility:** Private or public cloud, cloud agnostic, deploy same infrastructure across multiple clouds through blueprints

DXC Managed Multicloud Services powered by VMware features

- **True multicloud:** introduces a common cloud platform of optimizing the introduction of new services across hybrid/multiple clouds.
- **Consistent experience:** allows DXC's customers a cloud-agnostic strategy while maintaining consistent IT business processes across private and public clouds as never before. An integrated management plane enables true hybrid IT, allowing for consistent governance, self-service hybrid cloud, and multicloud automation.
- **Rapid deployment:** provides blueprint services for rapid, consistent deployment of new environments across private and public clouds. This allows you to initiate and manage new landing zones for workloads faster than ever before, as well as increase business velocity and deliver results as never before.
- **Best-in-class security:** gives end-to-end security from your multicloud environment by protecting operating systems, applications and data.
- **DevOps:** lets users integrate their continuous integration/continuous delivery (CI/CD) pipeline for automation and deployment in a consistent manner across multiple clouds. Drives the implementation of modern applications through automation and orchestration.

DXC and VMware partnership

Building on 15+ years of collaborative experience, we have an extensive track record of helping enterprises simplify IT and create and implement successful multicloud strategies. Our joint solutions for managed cloud services are built on VMware's market-leading technology and strengthened by DXC Technology's extensive IT and industry expertise. Both DXC and VMware are industry powerhouses. Together we have more than 56,000 experts and a vast ecosystem of partners to design, build, deliver and support digital transformation solutions. Our companies are integrated from the executive suite down to the delivery team level, and share a highly collaborative approach to working with customers. DXC and VMware at a glance:

- 15-year-plus partnership with deep strategic and executive alignment and a highly collaborative approach to engagements
- Joint cloud and workplace offerings leveraging VMware's market-leading technology and DXC's extensive IT and industry expertise
- Proven innovation, with DXC as VMware's 2018 Global Systems Outsourcer Partner of the Year and 2017 Empower the Digital Workspace Global Winner

About DXC Technology

DXC Technology (NYSE: DXC) helps global companies run their mission critical systems and operations while modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private and hybrid clouds. With decades of driving innovation, the world's largest companies trust DXC to deploy our enterprise technology stack to deliver new levels of performance, competitiveness and customer experiences. Learn more about the DXC story and our focus on people, customers and operational execution at www.dxc.technology.

Why DXC?

DXC Technology, the world's leading independent, end-to-end IT services company, manages and modernizes mission-critical systems, integrating them with new digital solutions to produce better business outcomes.

The company's global reach and talent, innovation platforms, technology independence and extensive partner network enable more than 6,000 private and public sector customers in 70 countries to thrive on change. With more than 100,000 VMware virtual servers under management around the globe and more than 2,000 certified VMware professionals, DXC provides you with the certainty that your environment is in good hands.
