Modern dynamics: assessment and roadmap solutions for Microsoft Dynamics AX

As cloud offerings and Microsoft Dynamics 365 technology evolve, the available options for your existing Microsoft Dynamics AX solution expand.

Benefits

- Aligns technology with business strategy

- Identifies areas for improvement

- Established priorities

The Dynamics experts at DXC Eclipse help clients assess their current Microsoft Dynamics AX environments and build a roadmap for the successful adoption of modern Dynamics 365 Finance and Operations, Enterprise Edition.

What is a solution roadmap?

A solution roadmap is a plan that addresses both short- and long-term goals with specific technology solutions and business process recommendations.

A successful roadmap:

- Focuses on aligning technology with business strategy

- Requires active involvement of key decision-makers

- Includes a rapid opportunity assessment to identify the most significant areas for improvement (technical/infrastructure, leveraging new feature/functionality and process)

- Establishes clear priorities based on business drivers and most significant areas for improvement

Why is a solution roadmap important?

Building a documented roadmap for an ERP solution establishes clear priorities that reflect your business strategy and outlines critical budget planning steps for upgrading to Dynamics 365 Finance and Operations. DXC Eclipse's solution roadmap provides an actionable plan to upgrade your ERP technology.

Active involvement of key decision-makers during the solution roadmap development process results in a plan to maximize the technology investment, by aligning process improvement with user experience and technology required to address short- and long-term goals.

Our team evaluates the latest features and functionalities and assesses sequencing improvements based on business priorities and opportunities. The team also reviews your current AX licensing and determines future licensing needs with Dynamics 365 Finance and Operations.

Your assessment and solution roadmap for Dynamics AX will provide:

- **Dynamics 365 Finance and Operations Solution Assessment:** recommendations for investigation, remediation and business performance improvement opportunities, where applicable.

- **Future State Vision Roadmap:** a phased approach for solution implementation as your business continues to grow.

- **Business Intelligence and Data Integration Review:** a thorough assessment of current and future needs for data integration and business intelligence, from current and legacy systems, to determine recommendations for a business intelligence solution.

- **Required Reporting Assessment:** a summary of current state of financial and operational reporting, and recommendation for path forward, utilizing as much of the current design as possible.

- **Dynamics 365 Finance and Operations Technical Assessment:** an enumeration of new and modified code elements, with recommendations for investigation or remediation, where applicable. Recommendations for infrastructure-related adjustments or remediation, where applicable.

- **Dynamics 365 Finance and Operations Upgrade Estimate:** a recommended upgrade path, summary of upgrade timelines and an estimate of upgrade effort.

- **Current State and Proposed Environment Diagrams:** diagrams of the implemented application environment and recommendations (existing documentation may be validated.)

- **Current State Installation Matrix:** a spreadsheet listing installed components, servers and instances (existing documentation may be validated.)

Why DXC Eclipse?

DXC Eclipse, a practice within DXC Technology, helps enterprise and mid-market companies accelerate digital transformation, solve business challenges and deliver intelligent solutions that make a difference for clients, employees and partners. We believe in delivering expertise, project transparency and excellent customer service in every engagement.

With team members in North America, EMEA, Asia and Australia-New Zealand, we are uniquely positioned to deliver Microsoft Dynamics 365, ERP, CRM, business process, analytics and collaboration solutions to clients across the globe. The largest independent Microsoft Dynamics partner in the world, DXC Eclipse serves more than 4,000 clients across multiple industries. Our practice delivers services and solutions that positively impact our world today and into the future.
