

Transform your workforce

DXC Digital Workforce for Oracle Cloud

Benefits

- Improve top-line growth with new employment models
- Exploit new digital trends that meet the expectations of today's employees
- Foster diversity and manage change
- Track and measure HR effectiveness
- Choose flexible solution options to meet your business needs

Modernize your HR organization and improve your ability to recruit, train and retain talent.

Meeting the human resource (HR) needs of today's enterprise is as challenging as other critical business functions. Innovative business models depend on equally innovative employment models. Competition for top talent is fierce. A healthy, values-driven culture is essential. Companies are also looking for reliable methods to track and measure the effectiveness of HR policies for compliance and risk management.

Legacy systems and applications were never designed to manage these types of demands, nor were they built with the kind of flexibility that HR needs today. To keep up, IT has to spend precious time and resources collecting and validating data, developing reports and updating spreadsheets. That's time that could be spent on critical innovation projects and business transformation goals.

DXC Technology's Digital Workforce for Oracle Cloud can help your organization meet these challenges. DXC delivers human capital management (HCM) solutions that increase HR system deployment speed, encourage standard business practices, and improve productivity, metrics and reporting. DXC offers flexible solution options to meet your business needs.

Update and optimize to empower your workforce

DXC Digital Workforce for Oracle Cloud helps you leverage a suite of Oracle HCM Cloud applications to empower

your workforce, exploit digital trends — such as mobility, social media and big data — and improve top-line growth with new employment models and strategies. DXC has the methodology, tools and skilled resources to help you plan and execute your digital transformation journey.

DXC Digital Workforce for Oracle Cloud uses industry best practices and workflows in a state-of-the-art software-as-a-service (SaaS) solution. This solution helps you redefine your HR business and provides value to every part of your organization, resulting in an improved customer experience, agility, faster time to market and fewer demands on IT — all at less cost.

Deep Oracle and cloud expertise

DXC has the proven expertise in full life-cycle services and support for Oracle Cloud applications to make your implementation successful. We offer best-in-class cloud solutions with flexible engagements from multiple centers of excellence around the globe.

As a high-value provider of business services for Oracle Cloud, DXC knows how to address your specific concerns and challenges with cloud migration, compatibility, integration, security and budget. We also have wide expertise in implementing diverse cloud solutions, including Amazon Web Services, Microsoft Azure and Oracle Cloud.

- **Scale.** DXC has more than 16,000 experts servicing more than 200,000 clients worldwide. Our Oracle experts average more than 10 years of Oracle experience. DXC also executes a rigorous Oracle implementation certification program in collaboration with Oracle University.
- **Speed to value.** DXC's Oracle Toolkit includes assessment questionnaires, estimation templates and preconfigured solution and migration tools. We provide a consistent, repeatable approach to accelerate cloud migration and deliver business results within weeks, not months.
- **Partner network.** DXC is an Oracle Cloud Select Partner with over 20 years of experience. As a cloud managed service provider (MSP), we have a formal partnership with the Oracle Cloud Success Management team. We are also part of the Oracle Cloud Excellence Implementer (CEI) program.

End-to-end assistance

DXC guides you through the entire process, from planning to continuous cloud optimization. We help you:

- **Assess and plan.** DXC performs a comprehensive assessment of your enterprise's current footprint, cost structure and cloud readiness. DXC defines a clear migration strategy and develops a business case with financial incentives to reinvest in digital transformation.

- **Transform and migrate.** DXC has the cloud experts, methodology and QuickStarts ready-to-use platforms to migrate your enterprise to cloud solutions and expedite its transition to a future operating model.
- **Run and optimize.** DXC manages and supports cloud platforms. We provide services for security, governance and compliance. We work with you to build a culture of continuous cloud innovation and optimization, which helps to maximize the value of your cloud investments.

Key benefits

DXC provides a potentially self-funding mechanism to help you build the right transformation strategy and execution plan. We outline a comprehensive transformation roadmap that considers the latest best practices, current initiatives and the future operating model. DXC has significant experience in building these roadmaps, and our extensive partner network has additional expertise to deliver cloud and hybrid IT solutions.

With more than 60 years of experience in transforming and managing infrastructure and applications, DXC has proven migration strategies to cut transformation time and an industrialized set of capabilities at scale on four continents. We bring

deep industry insights, best-of-breed solutions and joint intellectual property with our partner network, including Oracle and other leading partners.

DXC's technology assessments have uncovered value for a range of organizations across various industries. As an example, DXC's 40-day technology assessment for a bank identified \$45 million in savings in its underutilized footprint and achieved an additional \$22 million in savings by moving to a newer platform. Additionally, DXC's 4-week Oracle Digital Transformation Assessment for a healthcare organization identified \$40 million in improvement opportunities and supported a decision to reinvest in digital technologies.

Start your transformation journey now

Get started today by conducting a Cloud Readiness Assessment to plan your transformation journey to the Oracle Cloud. DXC Cloud Readiness Assessment will provide a Cloud Roadmap Solution aligned with your organizational goals and readiness, while capitalizing on existing legacy and cloud technologies.
