

DXC InAttendance for Cornerstone OnDemand

Directly integrate attendance into Cornerstone

Use RFID scanning for faster, more accurate tracking of live training attendance.

Benefits

- Designed specifically for Cornerstone users
- Instant attendance updates
- Faster completion monitoring

Are you manually entering training attendance in Cornerstone? If you need to log employee attendance at instructor-led training (ILT) or informal, on-the-job learning sessions, you can do it faster and more accurately than ever with DXC InAttendance. By tracking attendance using a radio frequency ID (RFID) badge, Quick Response (QR) code, bar code, or magnetic strip based on a learner's unique user ID or user name in Cornerstone, you can reduce administrative hassles and errors for almost any kind of in-person training:

- Demonstrate the proper use of new equipment on the floor of a facility.
- Introduce a new and significant administrative policy to public sector employees.
- Implement important revisions to privacy and recordkeeping protocols for healthcare workers.
- Deliver crucial updates on compliance regulations to financial services professionals.
- Present healthcare professionals taking CE hours.
- Track new product information.

To use DXC InAttendance, all you need is a web-enabled PC or tablet with USB or Bluetooth scanner.

Benefit immediately from:

- No paper rosters
- Real-time roll calls entered directly into your Cornerstone database
- Instant updating of attendance information
- Reduced attendance-tracking errors
- Faster attendance and completion monitoring
- Mapping of RFID numbers to Cornerstone IDs or user names (must have Cornerstone Reporting API)

Functionality

- Seamless integration with Cornerstone
- Ability to search and select relevant training types such as ILT, online materials and tests
- Ability to mark courses for any learner as registered or completed
- Compatibility with existing RFID badge, QR code or bar code readers

Requirements

- Cornerstone learning management software
- Cornerstone Web Services with outbound single sign-on
- RFID badge, QR code or barcode that contains a Cornerstone user ID or user name
- External hardware to scan QR code or barcode
- Web-enabled device with USB or Bluetooth capabilities
