

Transform your business by migrating to SAP S/4HANA

DXC Intelligent Migration for SAP S/4HANA

DXC Intelligent Migration for S/4HANA provides the right approach and tools to migrate current systems to the new SAP S/4HANA landscape, empowering companies to realize the benefits of SAP's digital transformation platform.

Enable business transformation

As companies develop and follow new digital business models, IT organizations often find themselves ill equipped to respond to changing technology needs. With priorities misaligned, IT and business organizations spend increasingly more of the budget on "keeping the lights on," rather than investing in new technologies.

Business conditions such as mergers, acquisitions, geographic expansion, new business models and regulatory requirements are forcing enterprises to embark on new initiatives. These changes require integration with a large and diverse legacy application estate, hampering major business transformation.

Move safely to a future-proof SAP S/4HANA platform

By moving existing legacy systems to S/4HANA, your enterprise can gain operational excellence, creating end-to-end intelligent processes. DXC's Intelligent Migration for S/4HANA will safely and securely move and transform your current SAP system.

S/4HANA and connected cloud solutions enable businesses to create intelligent processes, gain real-time business insights and conduct business anywhere, with an enhanced user experience. DXC Intelligent Migration for S/4HANA offers many benefits for enterprises moving to S/4HANA, including these:

Key benefits

- Support business transformation with flexible Intelligent Migration Framework
 - Ensure a cost-effective migration leveraging DXC's migration factory
 - Align migration approach to S/4HANA with long-term growth strategies
 - Quickly realize process improvements with DXC's migration service embedded with automation and AI
-
- **Increase efficiency** across the enterprise in all functional areas with innovations such as Demand Driven MRP, MRP Live, Fast Close and Embedded Analytics
 - **Reduce costs** with machine learning- and artificial intelligence-enabled processes such as Stock in Transit Predict and Manage, and Automated Cash App
 - **Improve user experience** with a Fiori-based simplified user experience, with fewer clicks and ability to do business anywhere
 - **Achieve corporate growth objectives** faster by rapidly designing and executing new business models

DXC Intelligent Migration for SAP S/4HANA in action

A manufacturing company running a highly customized SAP ECC [ERP Central Component] lacked the accountability, governance and controls to sustain the company's expansion.

DXC developed a customized plan for migrating from ECC to S/4HANA, with clearly defined business roadmap and growth plans, a transition to the cloud platform and a simplified user experience across lines of business.

This resulted in a seamless migration to SAP S/4HANA and a new operating model to facilitate business growth. Specifically, the manufacturing company:

- Integrated real-time analytics to power better business decisions
- Improved operations via integration of order processing, procurement and accounting
- Significantly enhanced performance with no loss of sales during transition
- Improved mobile capabilities and user experience through Fiori adoption/implementation

"DXC's innovative delivery approach, commitment to planned milestones, collaboration with our core business team, tools and accelerators, helped Everest achieve the SAP S/4HANA journey in just 100 days, with no loss of sales during the transition."

— CIO, Everest Industries

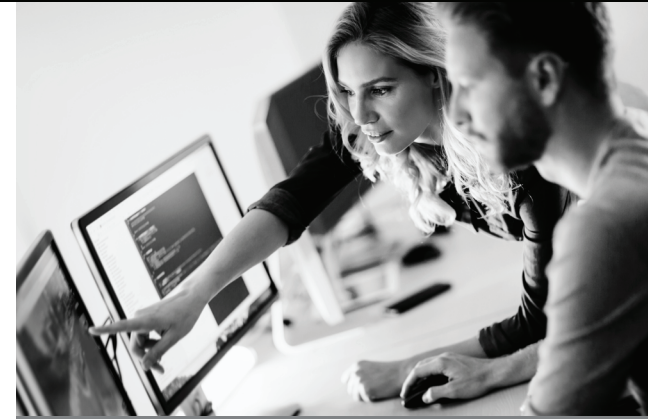

DXC Intelligent Migration for SAP S/4HANA partnerships

As an SAP Global Partner, DXC has worked closely with SAP and other partners to develop the Intelligent Migration framework. The end result of DXC's partnership with IBIS, smartShift, SNP, Datavard and Syniti will accelerate the customer journey, automate the process and bring value to the customer's business sooner.

As an example, with smartShift, DXC offers automated custom code analysis and remediation that enables more accurate assessments, shorter execution timelines, lower rates of testing errors and lower overall TCO for the transformation. With Syniti, we optimize data profiling, master data governance and the end-to-end transformation of data from legacy (SAP and non-SAP systems) to S/4HANA.

About DXC Technology

DXC Technology (NYSE: DXC) helps global companies run their mission critical systems and operations while modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private and hybrid clouds. With decades of driving innovation, the world's largest companies trust DXC to deploy our enterprise technology stack to deliver new levels of performance, competitiveness and customer experiences. Learn more about the DXC story and our focus on people, customers and operational execution at www.dxc.technology.

Why DXC?

- DXC's Migration Factory is enabled by migration experts and automation, resulting in a prescriptive approach to achieve consistent results.
- DXC aligns business objectives with the migration approach to achieve desired outcomes.
- DXC's end-to-end portfolio of S/4HANA-centric offerings enables digital transformation via the following: roadmap assessment, migration services, SAP cloud applications, cloud platform and applications management services.
- DXC uses accelerators, automation and AI to enable cost savings and faster results.
