

Benefits

- Defined value of moving to SAP S/4HANA for your business
- Managed, safe and fast migration to the future-proof SAP S/4HANA platform
- Enterprise-wide integration of SAP and non-SAP data and applications
- Flexible cloud options to alleviate the need for expensive infrastructure
- Improved operational environment and business processes
- Extended digital reach of your SAP systems to enable improvements in products and service
- Deeper business insight via real-time analytics

Industries benefiting from an S/4HANA migration

DXC's Accelerated Migration for SAP S/4HANA has delivered benefits to companies in a wide range of industries:

- **Retail:** Shorter planning time, faster reporting and simplified reconciliations
- **Energy:** Lower cost of ERP ownership, real-time decision-making capabilities
- **Process and discrete manufacturing:** Improved system performance, reduced maintenance cost, integrated supply chain optimization
- **Aerospace and defense:** Reduced MRP runs and financial reporting
- **Public sector:** Improved citizen engagement and experience, quality and speed to reporting
- **Insurance:** Improved reinsurance capacity, profitability and risk management with a holistic view of the entire life cycle

Accelerate your journey to a digital future

DXC Accelerated Migration for SAP S/4HANA

As businesses evolve their end-to-end process and customer experience to stay ahead of the competition, IT organizations must also determine how to rapidly respond to the changing technology needs of the business. Without proper alignment of business priorities, IT organizations spend increasing portions of their budgets on “keeping the lights on,” with less and less remaining for investment in future technologies. Why, how and when to transform the application landscape — these concerns should be at the heart of every organization’s investment roadmap.

Business changes such as mergers, geographic expansion and increased regulatory requirements are forcing enterprises to embark on new development initiatives that require integration with a large and diverse legacy application estate.

From a business perspective, the question is how to optimize a move to the latest technology while considering investment, risk and disruption. By moving existing legacy SAP systems to SAP S/4HANA, enterprises gain operational improvements by leveraging:

- New business processes
- Insights from real-time analytics
- Less risk and less disruption resulting from higher automation
- New revenue stream enablement

From an IT perspective, S/4HANA offers a state-of-the-art in-memory database, end-to-end integration across the SAP product suite as well as other non-SAP applications and data, and flexible cloud platforms. These advancements allow IT to have a solid innovation platform to deliver results quickly, at lower costs and with enhanced customer experience capability. A cohesive business and technology roadmap is critical to the business transformation’s success.

By using DXC Accelerated Migration for SAP S/4HANA, you will quickly and securely move your current SAP ECC system to S/4HANA with our low-risk factory approach. We provide simplification experts, automated code remediation and automated data transformation on premise or on a cloud platform — in a single step. To help you rapidly understand the move’s impacts, we work with you to provide a customized roadmap leveraging a variety of tools that minimize basic information gathering — allowing us to focus on the business and IT challenges.

Achieve business results by migrating to S/4HANA

SAP's Digital Core and connected cloud offerings enable businesses to improve processes, gain real-time analytics insights and benefit from a new user-friendly interface (Fiori), all delivered through the high-speed in-memory HANA database.

A migration enables real-time reporting, integration of big data, automated reporting, machine learning and artificial intelligence. DXC Accelerated Migration for S/4HANA enables many benefits for enterprises that are moving S/4HANA such as:

- **Speed.** A manufacturing company kicked off process improvements quickly due to DXC's fast migration services and gained 30% reduction in lead time and 50% reduction in manufacturing order-to-delivery cycle time.
- **Business benefits.** Engineering and defense customers gained 50% faster material requirements planning.
- **Value.** For a consumer packaged goods company, DXC's best-shore model helped keep migration costs within a tight budget and tight schedule.
- **Optimization.** For a retail client, an optimized platform improved system-response times, leading to reduced planning times, faster data retrieval, better reporting and simplified reconciliations.

Increase migration velocity and efficiency with standard and tailored packages

DXC works with customers of various sizes and complexities. With our factory approach, we streamline the value assessment and discovery process to create an S/4HANA migration roadmap. Through this process, our experts will confirm a standard package or tailor an approach to fit your needs.

Why DXC?

Global organization with a local presence focused on S/4 migrations

DXC has invested in creating a streamlined migration approach and has built focused migration centers/capacity across the globe. With over 15,000 SAP professionals worldwide, we strategically blend the best mix of onshore, nearshore and offshore delivery resources to meet your organization's needs. Blending our resources and global skills is at the core of our ability to deliver cost-effective and rapid migrations, while reducing your risk and business disruption.

Trust an experienced partner: Expertise matters

DXC is an SAP Global Strategic Services Partner, a Qualified Partner and a Global Platinum Reseller of SAP licenses. We have worked closely with SAP, to develop a migration factory model scalable for mid-size to large companies.

We have delivered more than 1,000 SAP implementation projects and assisted 2 million SAP-supported customer users. Our DXC data centers (global, regional and local) offer on-premises, public and private cloud solutions and accommodate all SAP application migration scenarios. Furthermore, our digital innovation centers support all our clients to enable agile thinking in order to solve critical business challenges.
