

DXC Project Services for SAP S/4HANA

New Implementation

Simplify, innovate and automate using SAP's next-generation business suite that future-proofs your business through digital transformation. Understand the value of S/4HANA and align it with a roadmap that unlocks business value and reduces cost.

Minimize disruption with S/4HANA innovation and automation

Responding to the challenges of today's economy requires organizations to become more resilient and to cut costs by quickly finding opportunities to simplify, innovate and automate. Yet legacy systems, which are difficult to maintain and costly to upgrade, hold many companies back.

Legacy systems perpetuate legacy processes that are inefficient due to customizations, as well as non-standard business processes that cannot be automated. Error-prone processes lead to fragmented customer experiences, resulting in dissatisfied customers and ultimately affecting customer retention. These complex applications — without an intuitive user interface — also thwart the adoption of new business processes.

In addition, legacy systems consume valuable resources — both IT infrastructure and human — without always providing a competitive advantage. Poor integration with the supply chain and lack of real-time visibility into business performance due to batch processes lead to inefficiencies and ineffective decision making.

End-to-end S/4HANA implementation support

To help you realize your strategy and growth objectives, and modernize legacy systems and processes, DXC Technology provides expertise for end-to-end S/4HANA implementation through DXC Project Services for SAP S/4HANA. S/4HANA is a next-generation business suite designed for digital transformation. Our implementation services help you architect new business models with agility, so you can capture growth opportunities. Our services cover all aspects of your IT environment, from applications to technical platforms, and leverage building blocks of S/4HANA on-premises, S/4HANA

Key benefits

- Architect new business models with agility to capture growth opportunities
- Make decisions based on facts and accurate, detailed, real-time information
- Achieve business efficiencies with automated, networked, event-driven and inherently compliant processes
- Lower your total cost of ownership with flexible deployment options to run systems in-house or in the cloud

Cloud, SAP Model Company and SAP Value Assurance, depending on your needs.

We start by helping you conduct an S/4HANA roadmap assessment to start you on your digital transformation journey. Our implementation services support the business as it creates new revenue streams from new markets and new business models and incorporates technological innovations to lead you toward becoming an intelligent enterprise.

Through our services, you can expedite time to value and speed profitable revenue growth by:

- Removing and discontinuing unproductive systems, redundant tools and excessive noncritical expenses
- Standardizing processes and business tools across the entire company — and even across the value chain
- Leveraging an agile, best-practices approach for implementing S/4HANA

DXC Project Services for SAP S/4HANA features

DXC's S/4HANA industry experts work with you to reimagine business strategies in a digital economy.

You'll simplify and optimize your IT landscape by leveraging S/4HANA on-premises or cloud edition as your digital core. Our implementations use a fit-to-standard approach and focus on value, innovation and business results.

DXC is qualified for SAP Model Company services for accelerated, best-practice-based implementations and the accompanying SAP Value Assurance services for cost-efficiency and risk management. SAP Model Company is an end-to-end reference architecture available for industries and lines-of-business, as well as a cross-industry solution for global enterprises.

DXC is S/4HANA public and private cloud certified. You can consume these software-as-a-service solutions on a subscription basis and receive quarterly innovations updates, resulting in cost savings and a lower total cost of ownership.

DXC Project Services for SAP S/4HANA partnerships

DXC works closely with SAP and other partners to enhance our Intelligent Transformation framework. Leveraging these partnerships with IBIS, smartShift, SNP, Datavard and Syniti, we accelerate your journey, automate the process and bring value to your business faster. Each partner works hand-in-hand with DXC to solve complex challenges.

As an example, with Syniti, we optimize data profiling, master data governance and the end-to-end transformation of data from legacy (SAP and non-SAP systems) to S/4HANA. Focused tools and services reduce execution timelines and minimize data errors. Our expertise in legacy environments, including JD Edwards, Dynamics, Oracle, Maximo and mainframes, simplify the data transformation.

About DXC Technology

DXC Technology (NYSE: DXC) helps global companies run their mission critical systems and operations while modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private and hybrid clouds. With decades of driving innovation, the world's largest companies trust DXC to deploy our enterprise technology stack to deliver new levels of performance, competitiveness and customer experiences.
