Create an adaptable, customer-centric, digital supply chain
DXC Supply Chain Management for Oracle Cloud

Benefits

- Logical, prepackaged solution to demonstrate value possibilities

- Minimal or zero customizations and reporting effort

- Faster deployments, scalable and adaptable

- Low-cost starting point and predictable pricing

- Transition from CAPEX to OPEX

Realize innovation and transform with an end-to-end digital supply chain to drive business growth.

Businesses struggle with the traditional supply chain operating model, which is more supply driven than demand driven. The traditional model doesn't offer the flexibility, responsiveness and agility to deal with supply and demand changes or customer expectations.

Businesses need to address both the complexities of global operations and the risk from the lack of end-to-end visibility. They need to ensure planning and execution are more responsive for faster, accurate and unique fulfillment experiences; to meet regulatory compliance; and to make decisions with reliable, near-real-time information. They need to transform and innovate their supply chain and stay at the forefront with new technologies in a hyperconnected, globalized world to differentiate against competition. Supply chain leaders want to overcome limitations of legacy IT systems, siloed processes, and constrained financial and human resources in order to modernize through process standardization, digitalization and automation with emerging technologies.

Transform your business with an end-to-end, digital supply chain

In today's experience-driven economy, new customer's demands bring supply chain to the epicenter of business. This shift demands capabilities to drive standardization and digitization to respond rapidly and deliver a personalized customer experience. DXC Supply Chain Management (SCM) for Oracle Cloud© ™ SM provides logical, prepackaged solutions, which are easy to adopt and deploy across supply chain business functions to meet aggressive time-to-market (TTM) needs. The solution leverages digital technologies and allows clients to create digital threads, which enables automation and seamless flow of real-time information to help the supply chain become more demand-driven, efficient, customer-centric and responsive.

Trust an experienced partner

Oracle Cloud is one of the most comprehensive suites of cloud solutions, with end-to-end architecture for modern supply chains, to digitally connect and transform business. DXC Technology offers a complete solution with the accelerators and skills to successfully migrate, transform and realize innovation through digitation and automation.

- **Higher customer satisfaction:** A global manufacturing company positioned itself as a leader in the Industrial Internet with their journey to cloud. The company consolidated from 200 to 40 enterprise resource planning (ERP) systems. They also implemented data-driven Internet of Things (IoT)

automation and predictive analysis to transform processes and provide end-to-end supply chain visibility.

- **Reduce cost and drive revenue:** A growing technology startup deployed Oracle Cloud Applications to modernize its supply chain operations to ensure a scalable, future-proof, cloud-based solution.

- **Speed to deploy:** A regional cement manufacturing company wanting to compete against a large company needed to replace its end-of-life ERP system with a modern platform. Oracle Cloud Solution increased internal efficiency and visibility and streamlined processes from production to sales to meet TTM needs.

Why DXC?

Comprehensive: DXC provides high value Oracle business services for Oracle Cloud, including assessment and advisory, transformation, applications management, automation and robotics, business process outsourcing (BPO) and IT outsourcing (ITO). DXC provides the capability to replatform, rearchitect, and rehost non-Oracle applications, and integrate between business applications and Oracle Cloud.

Cloud expertise: DXC brings wide expertise in implementing cloud solutions, including Amazon Web Services and Microsoft Azure together with Oracle Cloud services. DXC offers SCM agile process automation to perform data discovery and both drive and deploy more efficient process in the uptake of SaaS SCM.

Scale: DXC has over 16,000 experts servicing more than 200,000 clients worldwide. Our Oracle experts average 10+ years of Oracle experience. DXC implements and executes a rigorous Oracle implementation certification program in collaboration with Oracle University.

Speed to value: Our preconfigured DXC Oracle Toolkit provides a consistent, repeatable approach to accelerate cloud migration and deliver business results in weeks, not months, that includes questionnaires, configuration workbooks, test scripts and automation.

Partner alliance: As an Oracle Cloud Select partner with over 20 years of experience and an Oracle Cloud Managed Service Provider (MSP), DXC has a formal alliance with the Oracle Cloud Success Management team. Moreover, DXC is also part of Oracle Cloud Excellence Implementer (CEI) program, which recognizes superior customer cloud implementation services.

Key features

DXC Supply Chain Management for Oracle Cloud provides choices for the right strategy and solutions to build a modern, demand-driven supply chain. Our solution offers a 360-degree view of inventory from point-of-origin to point-of-sale. The offering facilitates faster adoption of digital technologies to operationalize innovations and optimize new product launches, helps improve supply chain effectiveness and buyer experience, and supports mergers and acquisitions. DXC helps reduce IT architecture complexity and cost of ownership (application, data, infrastructure, integration) by minimizing

existing customizations and integrating with other point solutions. Our experts help mitigate execution risks, ensure successful transformation to cloud and maximize returns on IT investment for long-term value.

Get the business value you need with digital supply chain

DXC Supply Chain Management for Oracle Cloud demonstrates value possibilities quickly with multiple choices to meet the unique needs of any organization. The prepackaged solution, with embedded best practices, dashboards, and a set of standard integrations and conversions, helps minimize customizations and reporting efforts to enable faster implementation and time to market. An iterative implementation approach, coupled with frequent process and feature updates from Oracle, helps pace and tune long-term transformation and cloud adoption. Our low-cost starting point and predicable pricing with clearly defined scope and timelines provide greater control of contract spend and require little or no new budget. We help companies transition from CAPEX to OPEX and realize innovation.

Next steps

Engage our Oracle SCM cloud experts to assess your readiness and discuss key business drivers and challenges. Our SCM transformation assessment will help you evaluate current state challenges and opportunities offered by modern digital supply chain to prioritize and achieve the desired future state and business value.
