

Master your logistics network

DXC Transportation Management for Oracle Cloud

Gain the most benefit possible from the Oracle Transportation Management (OTM) Cloud with solutions configured by experienced logistics professionals.

Benefits

- Reduce freight spend and service delays by managing your logistics with Oracle Transportation Management
- Improve efficiency in freight management with increased levels of planning optimization and order consolidation
- Anticipate disruptions to your logistics business through enhanced visibility

As competitive pressures grow, transportation management increasingly requires C-level executive attention. Challenges range from tracking and minimizing vehicle emissions to maintaining order and shipment visibility, while managing carrier capacity, volatile fuel costs, potential driver shortages and ever-increasing customer expectations. Cost reduction, careful planning and diligent preparation are key for organizations today as they address:

- **High transportation costs.** Enterprises often face the challenge of rising transportation costs and want to reduce freight spending across their logistics networks to run those operations more efficiently. Companies are looking to their logistics networks to make transportation more profitable.
- **Process inefficiency.** Spending time on repetitive tasks, engaging carriers without capacity, engaging suppliers and monitoring transactions – all point to inefficiency. Logistics departments are looking to achieve efficiency in all processes, from order management to billing and freight payment.

Neutralize logistics problems

DXC Technology's Transportation Management for Oracle Cloud leverages

the world-class capabilities of Oracle Transportation Management (OTM), coupled with DXC's unparalleled operational and applications experience. The solution supports both shippers and logistics providers with integrated planning, execution, freight payment and business process automation on a single application across multiple modes of transportation. DXC's offering shortens deployment timelines with preconfigured logistics solutions developed by our operational and technical experts. Spreadsheets and homegrown solutions can't compete with the efficiency gains, freight spend savings and visibility achieved by an algorithm-driven cloud-based logistics solution like OTM.

DXC helps you get the most out of OTM, a quickly deployable, web-native system built for the cloud that enables clients to simplify logistics operations through a single tool spanning the breadth of transportation processes, modes and geographies. DXC's accelerators, QuickStarts, strategic partnerships and techno-functional resources allow clients to enjoy a sustainable return on investment (ROI) in a shorter amount of time.

The solution helps enterprises control logistics with precision visibility by using a self-securing and self-repairing platform that requires no IT infrastructure to execute. This can help

reduce transportation overhead by 20 percent and reduce transportation costs by 8 percent. We provide:

- **Expertise** – DXC offers a robust OTM solution leveraging our more than 10 years of experience in delivering OTM/ supply chain operational solutions. Each DXC OTM team member holds a certification in OTM Cloud Implementation.
- **Customer focus** – DXC delivers a reliable and innovative customer experience, listening to our clients' challenges, hearing what they really need and then shaping solutions together with them. We leverage our change management strategy and deep experience in logistics to deliver operational efficiency.
- **Speed to value** – DXC provides preconfigured solutions that deliver business outcomes in weeks, not months. We also bring standardization to your logistics processes based on our deep understanding of operational, technical and organizational challenges.
- **Implementation approach** – DXC's implementation approach is tailored to rapid OTM deployment and considers all aspects of the project's life cycle. Operational experience coupled with technical understanding allows the DXC team to advise on not only technical issues but business topics as well.

- **Technology strategy** – DXC's team has expertise in both on-premises and cloud offerings of Oracle Transportation Management and can evaluate your business needs to recommend the best technological approach. Our strategic partnerships with value-added services create a best-in-class solution.

Drive efficiencies

DXC's Transportation Management for Oracle Cloud is designed to enable success in the adoption of a cloud-based transportation management system, using prebuilt OTM solutions and intellectual property to accelerate the implementation of OTM into your technical landscape.

Designed to support both shippers and logistics service providers (LSPs), OTM solutions manage all transportation activity throughout a global supply chain. Combining ease of use with industry-leading capabilities, these solutions enable clients to reduce freight costs, optimize service levels and automate processes so they can run their logistics operations more efficiently.

DXC Transportation Management for Oracle Cloud delivers a well-designed tool to manage your freight network while driving efficiencies in these areas: automation of manual processes, dynamic evaluation of freight rates, improved customer experience through

enhanced visibility, and meaningful business analytics.

Working together to bring you more

DXC is an Oracle Cloud Select Partner. As a cloud managed services provider (MSP), DXC has a formal alliance with the Oracle Cloud Success Management team. DXC is also part of the Oracle Cloud Excellence Implementer (CEI) program, which recognizes superior customer cloud implementation services.

Engage with DXC's OTM practice to further discuss how we can transform the way you manage logistics. Our experienced team can review your requirements and identify the right solution options for your organization. Next steps include:

- **Schedule a deep dive session.** Our experts can provide a comprehensive session that includes an OTM demo.
- **Perform a transformation assessment.** We can prepare a business case to demonstrate ROI, determine options for OTM cloud modules and prepare a roadmap with recommendations.
- **Start a test drive.** Test DXC add-ons with core OTM, then enhance with additional OTM modules.
