**EHR 2.0** support the new paradigm of healthcare

**The Patient Ecosystem**

**EHR 2.0**

- **Innovation**
  - Patient empowerment
  - Patient view
  - Active participation
  - Engagement

- **Healthcare ecosystem collaboration**
  - Health providers
  - Patients
  - Partners

**EHR 2.0 Trends in Healthcare**

- **Difference between the Hospital Centric Electronic Patient Record and the Electronic Healthcare Record 2.0**

**EHR Maturity Curve**

- **Support the Healthcare Transition**

**Recommendations for healthcare IT decision makers:**

- **Create a comprehensive architecture practice group to manage the transition of legacy architecture towards an EHR 2.0 platform approach.**

- **Engage with ICT suppliers to select those that can help increase maturity, agility, innovation, alignment, and strategic planning.**

- **Invest in technologies enabling the EHR 2.0 vision.**

- **Adopt technology that can support a transition of the healthcare delivery model towards patient-centric care delivery, personalized medicine, integrated pathways, value-based reimbursement, and omni-channel experiences.**

**The value of EHR 2.0 for the key stakeholders**

- **IDC Tech spotlight: The value of business transformation through EHR 2.0**

**Recommendations for healthcare IT decision makers:***

- **EHR 2.0** ensures the transition of the healthcare provider towards a more patient-centric care delivery model.

- **Integration strategy**
  - Point to point
  - Service orientated/micro

- **Standards**
  - Proprietary-application
  - Legacy technology
  - Cloud, mobile, IoT, Cognitive

- **Technology**
  - Industry coverage
  - Hospitals
  - Healthcare ecosystem

- **Healthcare providers**
  - Must progress through the stages of the EHR maturity curve.

- **Clinical operations,**
  - Care coordination that drives operational efficiency and productivity.

- **Boundaries around healthcare and population management.**
  - Patient flows are less of a cost focus, but focusing on patient-centric care.

- **New paradigms of collaboration between sectors and integrated care.**

**Business Outcome**

- **Increased business agility and value creation**

- **Innovation**
  - Patient empowerment
  - Patient view
  - Active participation
  - Engagement

- **Healthcare ecosystem collaboration**
  - Health providers
  - Patients
  - Partners
