

# Gain efficiency, cut costs and preserve investments

## DXC Managed Services for Oracle Cloud

Ensure world-class support for design, build and daily operations of Oracle Cloud, including compute, storage, virtual network infrastructure, databases and applications.

### Benefits

- Migrate workloads seamlessly with specialized tools and services
- Preserve Oracle investments and lower licensing costs
- Deploy regionally or globally with local expertise
- Reduce risk with automated provisioning and system management templates

Many organizations have invested heavily in Oracle products and customized applications that run on high-cost, high-maintenance legacy infrastructure. Moving the Oracle applications to a public cloud can increase efficiency and lower costs.

Consolidating databases and migrating to the cloud can help enterprises increase business agility and capitalize on all of the features and benefits of cloud deployment, while preserving their investments in Oracle applications. However, they must tackle challenges associated with cloud migration and ensure high reliability for the business.

### A single provider and single point of accountability

DXC Managed Services for Oracle Cloud enables you to preserve and leverage your Oracle investment and migrate applications to a certified cloud platform, all with a single provider that delivers a single point of accountability.

DXC Technology, a global Oracle audit-certified partner, provides a catalog of automated provisioning services for Oracle database, middleware and applications, infrastructure and software. This fully managed, consumption-based service includes monitoring, backup, security, patching and service management of the provisioned infrastructure, databases, middleware and applications.

For organizations heavily invested in Oracle customized, on-premises applications and/or Oracle databases, this service provides seamless workload migration using Oracle and DXC tools for cloud deployment, assuring 100 percent compatibility with on-premises deployments.

Protect your Oracle investment and lower your licensing costs by leveraging on-premises licences. Oracle applications and databases run best on Oracle Cloud. When you transform and migrate on-premises applications and databases to Oracle Cloud, you can reduce risk and increase predictability with automated provisioning and system management templates and procedures that ensure consistent, repeatable configurations and processes.

Managed Services for Oracle Cloud are delivered through one contract that includes Oracle infrastructure and platform cloud services.

### Enable digital transformation with legacy Oracle investments

DXC helps clients migrate both Oracle and custom applications. Our digital delivery platform assures high-quality services that drive operational savings and free up funds for innovation. Client results include:

- **Increased business agility.** DXC helped a leading pharmaceutical company consolidate existing

Learn more at

accounting and sales order management applications and implement new ones using JD Edwards solutions. This led to an integration of mobile applications and a more agile platform — both of which help improve employee and customer engagement.

- **Reduced cost and modernized applications.** DXC helped a leading construction and engineering company in Australia migrate Oracle E-Business Suite and Hyperion applications to the Oracle Public Cloud. DXC services enabled the firm to modernize and lower costs by deploying the applications on Oracle platform as a service (PaaS).
- **Reduced capital costs.** DXC supported a global beverage company's migration from traditional IT to the public cloud with the objective of reducing CAPEX and driving value from a consumption-based model.

#### Unmatched Oracle skills

DXC is uniquely positioned to help you get the most from Oracle Cloud:

- **Digital transformation services.** DXC provides a full range of services to modernize mainstream IT, integrate digital innovations and deploy new solutions at scale. These proven services unlock value through new business models, better customer experiences, faster time-to-market and increased productivity.
- **Oracle partnership.** DXC is closely aligned with Oracle's top-tier partner programs, including Oracle PartnerNetwork, Oracle Managed Service Provider (MSP) and Oracle Cloud Excellence Implementer. An externally audited and certified Oracle

MSP partner, DXC has won numerous Oracle Partner of the Year awards. DXC's deep experience ensures flexible, cost-effective terms and the best options for your business.

- **Oracle experts around the globe.** DXC's dedicated Oracle Cloud practice has 3,000 full-time professionals experienced in Oracle sales, presales and implementation, with a track record of successful Oracle cloud implementations across multiple regions. DXC has more than 25 years of experience transforming and managing Oracle enterprises.
- **Comprehensive hybrid cloud services.** DXC serves as a single point of accountability for every aspect of your cloud journey — advisory, transformation and management services that cover infrastructure, applications and operations. DXC ensures a single point of escalation and provides specialized tools, processes and services for risk mitigation, security and compliance.

#### Develop a roadmap for transformation

DXC offers a full stack of Managed Services for Oracle Cloud and is a trusted partner with a full range of strategies for moving workloads. DXC's expert advisors analyze and plan business and technology transformations and migrations.

DXC services support digital initiatives, including automated solutions for managing applications that help your organization react quickly and cost effectively. DXC's fully metered services ensure that you pay only for what you use and include pay-as-you-go or monthly flex models.

#### About DXC Technology

As the world's leading independent, end-to-end IT services company, DXC Technology (NYSE: DXC) leads digital transformations for clients by modernizing and integrating their mainstream IT, and by deploying digital solutions at scale to produce better business outcomes. The company's technology independence, global talent, and extensive partner network enable 6,000 private and public-sector clients in 70 countries to thrive on change. DXC is a recognized leader in corporate responsibility. For more information, visit [www.dxc.technology](http://www.dxc.technology) and explore [thrive.dxc.technology](http://thrive.dxc.technology), DXC's digital destination for changemakers and innovators.

You can spin up and spin down infrastructure in days instead of months. Services include SLAs for databases and applications.

#### A proven partnership

DXC and Oracle have been working together to deliver value to clients for more than two decades. Combining Oracle's extensive lineup of innovative technologies and DXC's deep industry and systems integration expertise, our strategic partnership helps clients streamline business processes, improve decision making and accelerate digital transformation. We offer:

- An extensive set of complementary offerings that can tailor solutions to meet a wide range of needs
- A global Oracle partner with deep expertise in both the management and implementation of Oracle technology and applications
- Access to DXC's dedicated U.S. and UK-based Oracle Solution Centers

#### Start your migration today

DXC can help you with every step of moving your enterprise to the cloud, including advisory services to plan your digital journey, application modernization services to transform and cloud-enable legacy systems, migration to help you cost-effectively move workloads to the cloud, and managed services to provide ongoing support.
