

Accelerate your application transformations

DXC Technology and Mphasis partnership

DXC and Mphasis at a glance

- Transform and modernize your business applications for public, private and hybrid clouds — at speed and scale
- Access ready-to-start experts quickly, both onshore and off
- Benefit from new approaches to software development that deliver secure, high-quality applications with radically shortened release production times
- Reduce IT delivery costs by as much as 50 – 75 percent

About Mphasis

Mphasis (BSE: 526299; NSE: MPHASIS) applies next-generation technology to help enterprises transform businesses globally. Customer-centricity is foundational to Mphasis and is reflected in the Mphasis' Front2Back™ Transformation approach. Front2Back™ uses the exponential power of cloud and cognitive to provide hyper-personalized (C=2XC2 TM=1) digital experience to clients and their end customers. Mphasis' Service Transformation approach helps 'shrink the core' through the application of digital technologies across legacy environments within an enterprise, enabling businesses to stay ahead in a changing world. Mphasis' core reference architectures and tools, speed and innovation with domain expertise and specialization are key to building strong relationships with marquee clients. Learn more at mphasis.com.

Increased disruption in business models in every industry has heightened the urgency to increase speed and agility for competitive advantage. While rapid transformation and modernization are key imperatives, they increase complexity and risks of unexpected delays and high costs.

Together, DXC Technology and Mphasis act as catalyst to accelerate application transformation goals with minimal risks and at reduced cost. Leveraging the exponential power of cloud and cognitive technologies, we enable enterprise clients to go beyond managing and thriving on change to drive transformational change.

Client benefits

With our combined deep industry expertise, strong portfolios in next-generation IT services and accelerated automation capabilities, we deliver multiple advantages.

Faster transformations. We enable you to capture the untapped value of the cloud for your core mission-critical and highly prized applications. We sustain this value by supporting these applications throughout their life cycle.

Lower costs. Our new consumption-based models replace the traditional full-time equivalent (FTE) models to manage your application.

Right skills. Our partnership provides you easy access to next-gen IT talent. Our innovative automation capabilities modernize your applications to run them optimally on leading public, private and hybrid clouds.

High quality. Using new approaches in software development, we deliver high-quality applications with radically shortened release times at reduced costs.

Joint offerings/solutions

Our partnership co-creates disruptive value in our clients' digital and cloud journeys in the following areas:

Application modernization and transformation.

Together, we harness the power of cognitive technologies and rich data to design smart end-to-end transformation of legacy environments.

- Our **"front-to-back" transformation capabilities** embed intelligence into customer-facing systems of engagement. We accelerate business outcomes by applying industrialized execution models, tools and processes.
- Our **applications-to-cloud capabilities** provide in-depth expertise and cloud services to drive speed, scale, agility and cost-effectiveness. We efficiently integrate our clients' transformation journeys — from consulting to cloud-native app development, migrations, operations, engineering and security.

Application development and testing.

Our consultative expertise selects the best cloud strategy for you to develop high-quality and secure software across B2C, B2B and B2E environments. We leverage traditional and next-gen technologies to enrich customer experience, accelerate business outcomes and drive customer loyalty for your business.

Application management services.

Our combined expertise significantly reduces application management costs and achieves better investment in digital innovation — at no extra cost. Our integrated service transformation platform seamlessly manages “on cloud” and “on-premises” application environments to drive business growth with enhanced service quality.

We provide a partnership of excellence in modernization and transformation supported by powerful service enablers:

- **“Zero-investment transformation” approach** plough back significant cost savings that we generate in application management into digital investments.
- **Microservices and DevOps capabilities** infuse agility and speed to drive that critical competitive edge.
- IP-based **cognitive solutions** leverage the power of cognitive computing, machine learning and virtual assistants to drive Front2Back™ modernization and provide a differentiated user experience.

Differentiation

The combined strengths of DXC and Mphasis in innovation, intellectual property and ability to reduce risk and legacy IT costs will free you to direct your resources toward modernizing mission-critical and highly valued business applications.

With a global reach and broad client base, DXC brings experience, domain expertise and specialized knowledge in application modernization and cloud enablement. Our clients benefit from our global IT consulting presence, industry-leading offerings and global strategic alliances with technology leaders, as well as our ability to deploy experts quickly, both onshore and offshore.

Mphasis’ deep industry expertise and strong portfolio of next-generation services and digital solutions perfectly complement DXC’s strengths. Industry recognition for Mphasis’ excellence includes:

- Awarded the Alconics “Best Application of AI for Financial Services” at the 2017 AI Summit for the Mphasis DeepInsights™ cognitive intelligence platform

- Recognized in the category “Excellence in Omni-Experience Technology” at IDC Insights Awards 2017
- Named the “Most Distinguished Digital Company in 2015” by *The Economic Times*
- Won the “2018 Stratus Awards for Cloud Computing” in the Artificial Intelligence category for in-depth expertise and cloud consulting services that help transform legacy environments
