

Guiding clients on the digital transformation journey

DXC Technology and PwC strategic partnership

DXC and PwC at a glance

- A global powerhouse combining the strengths of the world's largest independent systems integrator and a leading professional services firm to provide deep business and technology expertise
- Focused on four key areas of digital transformation: business model innovation, customer experience, business process transformation, and enablement of the digital core platform
- Joint solutions targeting transformation of cloud, digital infrastructure, business processes, service management, enterprise applications and workplace; GDPR readiness; and industry solutions in insurance, aerospace and defense

About PwC

PwC's purpose is to build trust in society and solve important problems. PwC is a network of firms in 157 countries with more than 223,000 people who are committed to delivering quality in consulting, assurance, advisory and tax services. Learn more at www.pwc.com.

The DXC Technology and PwC global strategic partnership brings together the largest global IT services company and one of the world's leading professional services firms. This partnership draws on PwC's expertise in digital and business strategy, consulting and program leadership, and on DXC's strengths in technology, execution and operations. Together, DXC and PwC take a holistic approach to understanding our clients' business needs, managing organizational change and using digital technology to drive real business outcomes — from business growth and enhanced customer loyalty to increased revenue, improved industry compliance, reduced operational costs and increased business efficiency. In addition, the combination of PwC and DXC helps our clients navigate the complexities of tax, compliance and other regulatory, of which technology is a key part.

Client benefits

Our partnership combines the strengths of the world's largest independent systems integrator with those of a leading professional services firm that provides assurance, advisory and tax services to clients worldwide. That means we can offer our joint clients deep business and technology expertise along with global scale and reach.

DXC and PwC work together through a joint engagement model that can adapt to client circumstances. This model provides a clear demarcation of roles, responsibilities and handoffs across the entire transformation journey, helping to ensure that clients have a seamless experience as they work with us.

Digital transformation can be complex and multifaceted, and its impact goes far beyond IT and IT costs. Together, DXC and PwC can provide the depth and breadth needed to understand and achieve end-to-end value for the business. That means being able to address everything from strategy, legal and compliance issues to creating roadmaps for change, developing the financial metrics needed to track results, managing the culture change needed for success, and implementing solutions. In short, this partnership provides one-stop shopping for complete end-to-end solutions that help clients navigate the challenges of digital transformation.

Joint offerings/solutions

We usually work together with our clients through a cycle of integrated business and technology strategies to create a roadmap. We then seek to use one of our joint offerings to develop a clear understanding of the client's integrated business, digital and technology strategy, formation and transformation design and planning.

Our capability-based offerings accelerate digital transformation. By bringing PwC's leading business, digital strategy and technology advisory services together with DXC's ability to deliver transformation at scale, we can drive and underpin major company-wide change programs as organizations prepare themselves for the digital marketplace. We also team closely with our clients to shape complex transformation when required to achieve the necessary outcome.

Some of our off-the-shelf offerings include:

- **Cloud and Digital Infrastructure Transformation.** A complete solution for transitioning to the cloud as a stepping stone for a broader transformation. Includes rethinking business models to disrupt the marketplace with innovative product propositions and customer experiences, and the ability to manage emerging cyberrisks. Sample domains include new digital business platforms, e.g., outsourced Amazon, Azure, Google.
- **Business Process Transformation.** Encompassing a range of business process services for areas such as customer experience, finance and administration, HR and payroll, and cards and payments.
- **Enterprise Application Transformation (UK only).** An end-to-end service for deploying third-party enterprise application software and solutions, both in the cloud and in traditional environments, including SAP and Oracle systems. We help clients define their strategies to transform from legacy systems to modern enterprise applications to cut costs, manage business operations more effectively, increase efficiency and become more innovative. Example domains include CRM, billing, supply chain, finance and digital and enterprise application transformation, and HR.
- **Service Management Transformation (U.S. only).** Transforming the service management experience using the ServiceNow platform for expansion, innovation and integration of enterprise service management functions.
- **Workplace Transformation.** Using mobile and digital technologies to increase employee productivity and workplace efficiency.
- **GDPR Readiness.** An end-to-end General Data Protection Regulation (GDPR) solution that includes risk analysis, remediation and supporting technology solutions, all designed to help clients prepare for compliance with the EU GDPR.
- **Industry Solutions (U.S. only).** Solutions designed to meet the needs of the insurance, aerospace and defense industries.

Differentiation

DXC and PwC help clients meet the challenges of digital transformation, and understand and take advantage of the opportunities it presents. Together, we work with clients to focus on four key areas where digital technology has the potential to create significant value:

- **Business model innovation.** Forging new links with clients and partners to create new ways of operating and competing.
- **Reshaping the customer experience.** Connecting clients' lifestyles with transactions and interactions in real time across channels, devices and processes.
- **Transforming business processes.** Using data to drive processes and decision making, and automating work to increase efficiency and quality.
- **Enabling the digital core platform.** Leveraging scalable service platforms and new digital technologies such as cognitive computing, robotic process automation, augmented reality, the internet of things and 3D printing.

Overall, our partnership enables us to support clients throughout the digital transformation journey — from strategy through implementation — with greater speed and reduced risk.

About DXC Technology

DXC Technology (NYSE: DXC) is the world's leading independent, end-to-end IT services company, helping clients harness the power of innovation to thrive on change. Created by the merger of CSC and the Enterprise Services business of Hewlett Packard Enterprise, DXC Technology serves nearly 6,000 private and public sector clients across 70 countries. The company's technology independence, global talent and extensive partner network combine to deliver powerful next-generation IT services and solutions. DXC Technology is recognized among the best corporate citizens globally. For more information, visit www.dxc.technology.
