Disruption and transformation — that's today's business climate, in a nutshell. In response, companies are rethinking the way they've been doing business and accelerating their own digital transformation — not only to keep up with new agile entrants in the market, but to move ahead of those late to change. And, to move fast, these companies need the best partners. That's why more and more clients are turning to the combined power of DXC Technology's end-to-end services and Hewlett Packard Enterprise's world-class portfolio of servers, storage, networking and converged infrastructure. Together, we spur on the digital experience and make it possible to thrive on change.

Client benefits

Partnerships can be powerful, and nowhere is the bond and synergy stronger than in a partnership forged through a shared history. DXC Technology was created by the merger of CSC and the Enterprise Services business of Hewlett Packard Enterprise in 2017, resulting in several unique benefits:

- A deep knowledge of the two companies' technology, innovation, products and services to provide the right solutions for businesses
- A like-minded vision to help clients transform their business to thrive under competitive pressure and market changes
- Flexible and affordable financing options through HPE Financial Services to fully enable digital transformation
- Strong, long-standing relationships both with shared clients and each other — built over time from the executive teams down to the point of execution, resulting in the ability to simplify, de-risk and increase efficiency of IT delivery

If you're ready to start or accelerate your digital transformation journey, the unmatched experience, expertise and global resources of these two innovative, proven leaders will help you transform and propel your business into the future.

Joint offerings/solutions

Together, we accelerate transformation in areas most critical to a successful digital enterprise:

Applications, data and analytics

solutions: Next-generation services from DXC, paired with HPE solutions for storage, high-performance computing or converged systems for SAP HANA, Oracle, Microsoft Analytics or Big Data, drive deep insights and intelligent action to optimize performance and lower total cost of ownership (TCO) of data infrastructure.

Cloud and hybrid IT: DXC's industry-leading offerings such as Managed Services for Microsoft Azure & Azure Stack combine with next-generation platforms from HPE to securely form the best mix of traditional IT, private and public cloud that can scale up and down to meet changing business needs. Together, this range of flexible and affordable infrastructure options, with solutions from HPE Financial Services, ensures that IT costs and services are continually aligned to the demands of the business.

Mobility and workplace solutions:

Campus and branch networking implementation or managed services from DXC align with the smart portfolio of solutions from HPE Aruba Networks that spans from access layer to the data center, enabling a "mobile first" strategy designed to securely and reliably accelerate mobility and internet of things (IoT) initiatives.

Intelligent Edge and internet of

things: DXC and HPE deliver on the new generation of digital experiences to transform businesses across manufacturing, energy and other industries.

Modern platforms with software-defined architectures:

DXC Infrastructure Services align with HPE hyperconverged solutions and composable infrastructure to simplify and optimize IT delivery and operations, creating value for enterprises of all sizes.

Differentiation

In a world where technology, applications and data are driving digital transformation, reshaping markets and disrupting every industry, success favors enterprises that can invent, reinvent and deliver new outcomes ahead of their competitors. However, with many options and a broad range of expertise required to determine the right mix of innovations in the data center, the cloud and computing at the edge, it is difficult to undergo a digital transformation alone. Partnering with DXC and HPE can bring it all together to propel your business further and faster.

HPE brings innovations in technology infrastructure, with a broad range of solutions from private, public and hybrid cloud, and from the data center

to IoT and the Intelligent Edge. DXC brings IT services leadership to help you assess, plan, design, implement and run the solutions that can enable you to capitalize on new business opportunities. HPE Financial Services brings a unique opportunity to finance the digital journey and take advantage of innovation, when it makes sense, at an affordable cost.

With proven experience accelerating digital transformation for clients in financial services, public sector, retail, transportation, manufacturing and other industries, many leading companies rely on this partnership to drive more agility and efficiency into their business. By offering an array of flexible consumption options to shift capital and effort from running to expanding business, DXC and HPE can help you adapt to new business models that offer the greatest opportunity.

With a broad range of solutions, expertise and innovations in digital transformation, this powerful partnership can support you during every part of your digital journey.
