

# Digital transformation drives success in a cloud-first world

## DXC Technology and Microsoft strategic partnership

### DXC at a glance

- We offer a wide range of transformative, proven solutions leveraging a broad array of Microsoft products, including Microsoft 365, Azure, Dynamics 365 and Windows 10.
- We earned multiple 2018 Microsoft Partner Awards, including:
  - Consulting & Systems Integrator Office 365 Usage Partner of the Year
  - Dynamics Customer Service Award
  - Inner Circle for Microsoft Dynamics
- We achieved the highest level of Azure certification: Azure Expert Managed Service Provider (MSP). This certification — achieved by only 35 Microsoft partners — recognizes DXC's high reliability in providing Azure cloud services.

### About Microsoft

Microsoft enables digital transformation for the era of an intelligent cloud and an intelligent edge. Its mission is to empower every person and every organization on the planet to achieve more. Learn more at [www.microsoft.com](http://www.microsoft.com)

DXC Technology and Microsoft are leading the charge in the digital revolution. Global strategic partners for over 30 years, we deliver transformative digital offerings that help clients harness the power of innovation by creating new ways of connecting people, data and processes. Together, we deliver tangible business results on the Microsoft platform to ensure that our clients have the insights, agility, control and security they need to confidently thrive on change.

### Client benefits

DXC and Microsoft jointly develop and implement solutions that combine the strengths of Microsoft's leading cloud platform with DXC's unrivaled expertise, consulting, systems integration and managed services capabilities. We lead our clients on their digital transformation journey using an intelligent cloud platform that seamlessly integrates the entire Microsoft stack.

Creating strong connections among people, data and processes enables us to help clients reduce complexity and improve efficiency and collaboration, providing control and security. DXC delivers enterprise-grade solutions that are:

- **Intelligent.** We foster quicker, more proactive decision making by optimizing, managing and monitoring application workloads on the Microsoft platforms and clouds; consolidating and integrating data; and offering powerful predictive analytics.

- **Modern.** We use the flexibility and agility inherent in public, private and hybrid clouds to provide a platform for growth that empowers people and businesses to innovate and collaborate — anywhere, anytime.
- **Secure.** We minimize risk and exposure, augmenting Microsoft cloud-based solutions and user environments so they are protected, resilient, regulatory compliant and auditable.

### Joint offerings/solutions

DXC helps clients move to more agile, service-oriented IT models — improving their ability to adapt to changing market conditions and drive business growth — via these solutions and capabilities:

**Workplace and mobility solutions.** DXC MyWorkStyle delivers a modern workplace by providing employees a consumer-like experience with enterprise security and instant collaboration. Access to applications and data, anywhere and on any device, promotes greater productivity and effective decision making across the enterprise.

We leverage Microsoft's cloud services — including Microsoft 365, Skype for Business, Teams, Exchange and SharePoint — to improve the user experience.

#### **Enterprise and cloud applications.**

Our solutions use the market-leading Microsoft Dynamics 365 platform to provide adaptable business management capabilities for all application deployment models, including cloud, on-premises, traditionally hosted and hybrid. Our extensive experience with the Microsoft Dynamics portfolio lets us deliver greater productivity by deeply integrating Dynamics 365, AX, NAV and customer relationship management (CRM) with Microsoft Power BI analytics.

#### **By the numbers**

- **20,000+** Microsoft trained and certified professionals
- **70** countries represented in our global delivery network
- **8+ million** user devices under management

**Cloud and platform services.** Our end-to-end services unlock the flexibility and affordability of Azure in the public cloud or on premises with Azure Stack, with full support for application transformation, migration and 24x7 management and monitoring. Managed cloud services deliver SAP resource management capabilities based on market-leading automation, simplified operational processes and enterprise-grade reliability on the Microsoft Azure cloud.

**Analytics.** With Microsoft Azure IoT, Cortana and Power BI, DXC helps enterprises take advantage of rapid advances in artificial intelligence (AI), automation and core analytics to raise their “analytics IQ” and quickly turn data into intelligent action. DXC's approach to moving analytics workloads to Azure lowers both the cost and risk of migration. With optimized workloads and processes, businesses can rapidly access all available data — internal and external, structured and unstructured — to better understand customers and predict future needs.

**Application services.** We accelerate digital transformation by promoting the adoption of Microsoft Azure faster, safely and at scale. Using proven DXC intellectual property (IP) to rapidly migrate and reinvigorate legacy applications on Azure, we help enterprises exploit the core business IP in their applications and data using platform-native services from Azure.

**Software licensing and management solutions (SLMS).** DXC SLMS provides a strategic approach to software management and optimization. Our solutions reduce costs and risks by enhancing visibility and control across the license estate, and by improving software pricing, terms and compliance.

**Security.** Security is a foundational element of every DXC and Microsoft solution. Working across the infrastructure, platform and application layers, we help clients safeguard their corporate data, manage risk, promote business continuity and ensure compliance.

#### **Differentiation**

DXC delivers highly differentiated solutions on the Microsoft platform in a wide array of environments that successfully address the complex needs of our enterprise clients. We align our portfolio expertise across healthcare, financial services, travel and transportation, retail and manufacturing to create specialized industry solutions. Our hosted and managed services provide a complete solution while offering easy interoperability with Microsoft's best-in-class cloud services.
