

Optimize your defenses with proven threat detection and response

DXC Intelligent Security Operations Advisory Services

Safeguard critical assets and increase enterprise visibility with world-class intelligent security solutions.

Benefits

- Rapidly reduce time to detect threats.
- Understand the scope of the threats with proactive identification.
- Ensure security visibility across your enterprise with intelligence-driven approach.

As cyber threats become more frequent and sophisticated, enterprises must find the best solutions for bolstering security to prevent attacks and minimize impact. The cost of cyber crime will rise to a staggering \$8 trillion globally over the next five years, according to a 2017 estimate by Juniper Research. At the same time, increased regulatory pressures to safeguard data, combined with the pressing need to recruit and maintain skilled cyber security professionals, are ensuring that enterprise security remains a top priority.

Accelerated adaption

To address these challenges, DXC Intelligent Security Operations combines our end-to-end portfolio of advisory services and managed security services to ensure comprehensive visibility and response capabilities across your enterprise.

At DXC Technology, we help you adequately keep up with continuous threat evolutions, enterprise security operations must be able to make accelerated adaptations. Enterprises need security operations to be intelligent because adversaries are coming up with new, innovative ways to attack every day. Having the ability to quickly adapt to the changing security landscape must become the defining quality of security operations.

As attackers target high-value enterprises, companies must find the best ways to contend with known and

unknown threats. With a focus on a proactive approach to discover unknown threats and enact swift remediation, DXC provides the forensic and analytical skills to help you deal successfully with complex cyber security issues.

Monitor, protect and defend

Backed by skilled professionals with deep industry experience, DXC Intelligent Security Operations includes Security Operations and SIEM advisory, threat intelligence, incident response and forensic specialists to mitigate breaches and help you fully understand the threats you face. This solution is an integral part of DXC's portfolio of enterprise security offerings designed to protect your business-critical assets.

When a security incident occurs, DXC will help you determine the full extent of the breach and its business impact. Our incident responders and forensics experts are available 24x7x365 to enable a rapid response and minimize disruption. As part of our incident response solution, we quickly locate compromised devices and swiftly return your enterprise to normal operations.

DXC works closely with you to define a security operations capability that suits your business needs. DXC advisors work

dxc.technology/security

closely with our clients to ensure that the full spectrum of security operations requirements are fulfilled. DXC provides:

- **Surge capability.** Our experienced professionals can augment your security teams to ensure that at times of reduced internal resources, or heightened risk, your security operations are at full strength.
- **Security operations and SIEM advisory.** Whether an enterprise wants to build a SOC from scratch, or to fine-tune a SIEM, DXC SecOps advisors can help elevate your operations to their optimum level.
- **Advanced threat monitoring and defense.** Our Threat Intelligence and Threat Hunting services help you identify and target advanced threats and attacks, minimize downtime, and prepare for improved responses in the future.
- **Forensic expertise.** Our Digital Forensics services help you maintain data in a legally acceptable way, all with minimal disruption to your business.
- **Risk reduction.** DXC's experienced security experts can help you establish effective and cost-efficient systems and processes that reduce your organization's risk from cyber security attacks.

Unique security expertise

DXC's security experts constantly manage real-world incident responses at some of the largest organizations across the globe, giving us unique insights into the decisions that executives will face during a breach scenario. DXC can help

enterprises develop an improvement roadmap to ensure their response capabilities improve to meet the next attack.

Our experts are also able to detect threats using DXC's Advanced Compromise Assessment (ACA).

DXC conducts signature sweeps of our clients network to make sure that their defenses are operating properly and to search for adversaries. With ACA, you can:

- Identify whether adversaries are active within your enterprise
- Monitor internet gateways and traffic to identify threat actor communications
- Perform initial investigations of selected endpoints to search for indications of a compromise
- Trigger incident response if adversaries are identified

Choose the best security partner

With a global workforce of highly experienced security professionals, DXC is an industry leader in enterprise security. Our advisory-led approach reduces risk, and our intelligence capabilities and partnerships drive advanced detection. What sets DXC apart:

Experience and expertise. DXC is one of the few companies in the world that can provide a single source for security managed services, advisory services and best-of-breed third-party technology that deliver comprehensive remediation plans and security improvement programs.

Unmatched global scale, reach and visibility – DXC's global network of more than 12 Security Operations Centers (SOCs) delivers unmatched reach and reliability. DXC employs more than 4,000 security professionals across the globe who are available 24x7x365 to respond to your immediate needs.

Technology independence. DXC's expansive threat intelligence enhances monitoring and detection services, and our technology partnerships with security leaders fuel innovative solutions.

Experts in Security Operations (SecOps) architecture design – DXC builds, transforms, optimizes and operates some of the largest SOCs in the world. Our Cyber Defense Blueprint provides best-practices SecOps architecture, and our methodologies are based on DXC's proprietary Cyber Reference Architecture.

DXC has a deep understanding of the security challenges and threats facing specific industries. Our advisors have deep experience in assessing, architecting and transforming security for thousands of clients across the globe. DXC's managed security services professionals can work alongside your SecOps teams, or we can supplement your staff to enable defensive surges at times of heightened threats.
