General Data Protection Regulation Services

Accelerate your compliance with the European Union's new data-protection rules using DXC Technology's end-to-end, approach to data security, analytics and legal issues.

- Accelerate timelines with DXC's cross-discipline approach and enterprise blueprints

- Significantly reduce the risk of noncompliance and minimize exposure to potential fines

- Dramatically improve overall data protection and privacy

- Avoid manual costs related to searching and deleting customer records

- Minimize retained data and lower storage costs

- Improve protection of customer privacy — and protect your brand'

Are you liable for GDPR compliance?

Even if your organization is based outside Europe, it still may be affected by GDPR. The European Union (EU) rules will apply to any organization — no matter where it's based — that:

- Offers goods or services, including those that are free, to EU citizens

- Monitors the online behavior of EU citizens

- Holds and processes data on EU citizens

Analysts predict that more than half of all affected companies will be noncompliant by year-end 2018, predicts Gartner. Failure to comply by that date could trigger fines of 4 percent of your organization's annual revenue or €20 million, whichever is higher — yet another reason why now is the time to accelerate your GDPR compliance.

Few organizations are fully prepared for the European Union's General Data Protection Regulation (GDPR), which goes into effect in May 2018. With DXC Technology's end-to-end services, your organization can accelerate its journey to GDPR readiness — and lower your compliance costs and risk, avoid the EU's potentially huge fines.

Compliance requires proactive data management and protection. That's why DXC GDPR Services integrate our advisory services, proven analytics and security solutions and legal advisory services for rapidly implementing and managing enterprise-wide GDPR.

DXC can quickly deliver your GDPR assessment and support your data protection officer on the implementation:

- Determine how your personal data processing activities align with GDPR requirements

- Identify and categorize your organization's personal data

- Assess your organization's readiness by examining the full scope of capabilities, from strategy, leadership and governance through operational and technical security

- Create a data inventory, assessing compliance readiness and risk

The DXC approach

STEP 1: Data discovery and diagnostic

DXC uses a series of 170 factors to assess GDPR compliance readiness, and we examine your security posture. DXC then builds an inventory of GDPR-relevant data, classifies it across the entire information estate and then reports on data types and categories, which enables data life cycle services.

STEP 2: Privacy improvement design

We design your future model, analyze compliance gaps, develop your security architecture, create a prioritized roadmap for future compliance and conduct cost-benefit analyses..

STEP 3: Improvement program

DXC's accelerated privacy improvement program leverages our vendor-agnostic and versatile Cyber Reference Architecture, based on nearly 350 discrete security capabilities built from best practices to address complex transformation programs. Then our GDPR blueprint accelerates the development of your GDPR solution.

Analytics plus security

DXC GDPR Services integrate our advisory services with proven analytics and security solutions. Here's what's included:

Analytics

- **Data portability and access:** DXC helps ensure your customers can obtain their data in interoperable and electronic forms and have it sent seamlessly to other organizations.

Under GDPR, customers must be able to easily and securely move, copy and transfer personal data among IT environments. We also focus on ensuring an excellent user experience.

- **Data minimization:** With DXC's help, you'll accelerate your compliance with two other GDPR requirements: processing only the data necessary to achieve a purpose and retaining customer data for only as long as required. You'll empower your customers to implement, automate and enforce information-management policies throughout the life cycle, including policies for retention management.

- **Erasure and rectification:** GDPR gives your EU customers the right to prevent the processing of their personal data in certain situations and also gives them the right to have it erased. We can help your organization move faster toward processing this data in accordance with GDPR.

Security

- **Data protection:** GDPR requires that data be processed securely. We can help you quickly comply with encryption, data-loss prevention, access controls, policies, processes and procedures.

- **Data breach notification:** Under GDPR, organizations must notify individuals of any personal data disclosure promptly, and they must also notify supervisory authorities within 72 hours. Again, we can help you move rapidly toward compliance.

Why DXC?

DXC is uniquely positioned to accelerate your GDPR compliance. We're the world's leading independent, end-to-end IT services company, serving some 6,000 clients in more than 70 countries.

DXC's team includes 4,000 security specialists, another 4,000 analytics professionals, 300 information-governance consultants and a global network of security operation centers. We also draw on our ecosystem of partners — more than 250 in all, including HPE, PwC and ServiceNow.

DXC is strictly technology- and vendor-agnostic. We offer a rare combination of security and analytics services and solutions, along with an industry-leading security architecture that leverages your existing investments.
