

# Accelerate airline fare pricing

## DXC Technology Fares

Rely on the robust system that powers airfares for some of the world's largest airlines. With DXC Fares, you get immediate, flexible, accurate pricing of itineraries based on industry standards.

### Insights

- Airline pricing demands timely, efficient, and accurate calculations, despite highly complex business rules, and vast amounts of ever-changing industry data.
- At the same time, airline fares must adhere to industry standards and regulatory requirements.
- Fares fully processes ATPCO filings, offering maximum flexibility to optimize yields.

### Get the answer with Fares

Airlines need immediate, flexible, and accurate pricing in today's competitive market. Get up-to-the-minute precise airfare pricing for even the most complex itineraries from Fares.

Fares, part of our DXC Passenger Services, delivers accurately calculated pricing based on up-to-the-minute published and private fares, rules, taxes, and currencies. The industry-leading Fares product accesses the most current data and performs accurate transaction calculations to support your sales process. It also incorporates a wide variety of transactions to fully support your airline fare needs.

### Consider the advantages

- Gain a competitive edge with immediate availability of your data changes for calculation—typically within two minutes of when DXC receives each transmission.
- Sustain high levels of satisfaction for airline and passengers alike, due to extremely accurate calculations and proven system availability.
- Benefit from an integrated solution that includes fares, reissues, refunds, and service fee capabilities—including baggage. All work together seamlessly and provide consistency for sales needs.

### Satisfy key business needs

- **Comprehensive**—The base fares system is supplemented with key inclusions. These include ATPCO Category 31 and 33 for ticket reissue/refund, and ATPCO Optional Service Fees for free/charged baggage and selected product catalog offerings.
- **Industry-aligned**—The system follows IATA industry standards, and supports all ATPCO categories with a complete set of public and private fares.
- **Reliable**—Fares architecture enables rapid failover and redundancy, offering proven, mission-critical reliability in production.
- **Deep**—The system accommodates pricing and displays 24 months of historical data.
- **Service-focused**—Our solution-specific support desk is available 18 hours a day, and staff are on call for around-the-clock support.
- **Accessible**—The web service is XML-enabled via the DXC service-oriented architecture (SOA). This expedites transaction calculations through virtually any sales channel.
- **Value-driven**—This cost-effective solution is built on a low-cost platform.

**Insights**

It's a simple reality that time is money, meaning you need to quickly power through highly complex airline fare calculations for maximizing revenue, and staying ahead of rivals. That requires accuracy in determining the cost of passengers traveling to and from destinations around the globe. And, it demands access to the most current data through a powerful transaction system—one that can calculate complex business rules with vast amounts of ever-changing industry data, and ensure adherence to industry and government standards.

- **Flexible**—With Fares, you can quickly and easily customize your viewing options and calculations without resorting to software change requests.
- **Full-featured**—Fares provides complementing transactions for a comprehensive fares tool set. These include fare display, rules text, discount pricing, and mileage/currency displays.

**Rely on our top-flight credentials**

- Recognized leader in airline fare pricing, we have powered high-quality, accurate pricing since the 1980s.
- Worldwide customer base for our airline fare solution, supports diverse tier 1 to tier 4 airlines.

- Fares architecture was developed and designed from the ground up. Several major industry providers have relied on DXC expertise by successfully licensing our product's technology.
- Deep knowledge and proficiency brought to our airline fare solutions by our team members averaging more than 15 years of experience in airline pricing.
- Trailblazer in automating airline industry data-driven solutions—first major fares provider to implement ATPCO Tax in April 2011, and first to debut the ATPCO Automated Rule product.
