Insights

- With Flight Operations, you leverage reliable information that enables you to make smart and timely decisions.

- Flight Operations enables your flight operations staff to be more productive and generate operational cost savings.

- Leverage Flight Operations to maximize your existing IT investments and quickly develop innovative applications to improve your flight operations business.

Elevate your flight operations performance

DXC Technology Flight Operations

Achieve better business outcomes with DXC Flight Operations.

Is your technology holding you back?

Are you able to effectively handle disruptions to your operations? Do your systems impede you from making smart decisions quickly to solve issues? Do your users rely on the right information to make the right call? Are your operations costs increasing? Is your customer experience impacted by your flight operations? Are you able to adapt to meet your business needs or changes in regulation? Is maintaining your applications too complex?

DXC provides next-generation applications that can address these pain points to raise the performance of your flight operations and meet your airline's business needs.

DXC Flight Operations

Flight Operations is a suite of applications that efficiently integrates flight operations-related systems. It empowers personnel to effectively manage flight operations, helping improve the quality of their decisions, generate cost savings, and increase their productivity.

Improve your decision-making

Our applications improve your customer experience by allowing your personnel to quickly identify operational issues and develop real-time resolutions.

Generate cost savings

Our solution helps you optimize your fuel consumption, improve the airline's on-time performance, and reduce system maintenance costs. It allows you to grow your airline and maximize the return on existing investments of flight operations-related systems by freeing up resources to focus on critical tasks to support the business.

Increase your employee productivity

Our applications improve user productivity via their intuitive graphical interfaces. These interfaces allow for quick adoption by experienced and new users, and automate time-consuming tasks.

Leveraging Flight Operations, you can drive innovation by reusing its functionality to quickly develop new applications that improve your flight operations business.

Efficiently integrate your systems

The solution seamlessly integrates with your flight operations systems. It provides a single source of flight operations data that supports better decision-making, eliminating data latency and synchronization issues that negatively impact your operations and customers.

DXC's flexible deployment models (software-as-a-service, hybrid, on-premises) provide the flexibility you want and enable you to minimize investment and implementation risks.

Realize the value of DXC Flight Operations

Using the Flight Operations offering, one of the world's largest airlines was able to:

• Fully integrate ACARS communication for its aircraft fleets with all of its ground systems without making major changes to its legacy systems

• Ensure the timely and accurate delivery of air-to-ground messages to its diverse fleet of airplanes

• Reduce costs and time required to make modifications to the aircraft ACARS

DXC transportation experience at work for you

With DXC as your partner, you will benefit from our deep knowledge of the flight operations industry— from business and technical perspectives—as well as our proven track record with mission- critical industry applications, high availability hosting, and advisory services.

Our seamless system integration, delivery methodologies, and flexible deployment models simplify the implementation process and help you save time and costs.
