

DXC Services for G Suite

Provide new ways of working, connecting and collaborating anytime, anywhere, on any device — with DXC's fully managed services and unified communications environments.

Dynamic work environments require new approaches

As workforces are evolving and adapting to dynamic work environments, businesses are seeking new ways for employees to collaborate and remain productive. Business leaders are faced with economic challenges and the need to keep remote workers connected, engaged and productive.

Organizations are now looking to Google G Suite to keep their business running and to deliver the experience employees expect. In the past, migrating to a collaboration platform could be challenging and complicated. Working with an experienced migration expert, however, allows organizations to avoid disruption for employees and to the business.

A fully managed, modern workplace solution

DXC Services for G Suite provide advisory, transformation and managed services that help customers integrate G Suite into the fabric of their business and IT infrastructure. This modern workplace solution can coexist with other technology environments and infrastructure, such as hosted environments and Microsoft Office 365.

DXC Technology's fully managed environment supports all critical steps for a successful digital transformation — including deployment, migration of data (both mailbox and personal data) and management of change programs to drive adoption. DXC's services provide a single point of contact and lead to full visibility, high service availability and ongoing performance management.

Key benefits

- Maximize employee productivity and increase collaboration
- Increase business agility and enable remote working
- Integrate with your existing email and infrastructure, including Office 365
- Migrate quickly and reliably
- Cut capital costs by reducing server and hardware needs
- Lower IT maintenance and software licensing costs

Transformation and delivery experts

Whether our customers require a solution for Google alone or a wider transformation and integration project, DXC has the experience, expertise and track record to deliver according to each customer's agenda and goals, budget and timeline. We have migrated some of the most complex customer ecosystems with multiple technologies and environments, demonstrating that we have a proven transformation methodology that accelerates deployment and adoption.

G Suite Essentials: Integrates with existing mail and calendaring systems

G Suite Essentials is a deeply integrated workspace that helps you and your team connect to the people, content and knowledge needed to get work done faster. It is designed for organizations and teams that have an existing email solution but want to use Google Meet, Drive, Docs, Sheets and Slides for content collaboration and connectivity.

Hosted in the cloud and easily integrated with existing mail and calendaring systems, G Suite Essentials includes Google's robust Meet video- and voice-conferencing, which can host up to 150 participants who can be invited and join via their Microsoft Outlook calendar. G Suite Essentials can be implemented as part of a standalone G Suite deployment, or in tight integration with elements of Microsoft Office 365. For larger organizations, G Suite Enterprise Essentials can host up to 250 participants and includes additional collaboration and security features.

DXC services overview

- **Professional services.** DXC has extensive experience helping organizations transform their current business processes.
- **Transformation services.** Our services are designed to accelerate your journey to G Suite Essentials and mitigate risks that may affect your business continuity.
- **Management services.** DXC manages the environment and provides support that covers the management of the G Suite or G Suite Essentials environment and incident response. DXC is your single point of contact for timely resolution, with two levels of support coverage.
- **Flexible purchase and pricing options.** DXC enables lower upfront spend, with service pricing per user, per month.

Why DXC and Google Cloud partnership?

DXC delivers managed services on the Google Cloud Platform and is a Google Cloud Premier Partner.

- DXC has demonstrated customer success in several key areas, along with dedicated expertise in Google Cloud products.
- The partnership provides DXC access to support and roadmap resources for G Suite, giving you architectural and operational insight into G Suite Essentials.
- As a Google Cloud reseller, we can help you acquire G Suite licensing and provide ongoing management of your services.
