

DXC Services for Microsoft 365 and Teams

Get everything you need for your move to the cloud for enterprise productivity with DXC Technology.

Business case

An increasingly dispersed global workforce, consumerization of IT and ongoing cost pressures are forcing business leaders to reimagine how people work, communicate and collaborate. Employees expect and demand secure and convenient access to communications and key productivity applications at the office, from home or remotely.

Many organizations are looking to Microsoft 365 and Teams as the productivity solution that will meet these needs. However, to take full advantage of these applications, migration and user adoption can present challenges that require significant planning and preparation, especially as new capabilities are being continually added. Once achieved, it's vital that employees continue to receive the support they need to effectively use these new capabilities, minimize business disruption and maintain productivity.

DXC provides planning, migration and user-adoption capabilities to help you move employees and data quickly and seamlessly. Our end-to-end delivery model leverages DXC-staffed Microsoft FastTrack teams, DXC support services and dedicated Microsoft support teams. This ensures that your employees can work more efficiently and collaborate more effectively from anywhere, and businesses get much-needed support to focus on running other parts of the enterprise.

Together with Microsoft, we leverage our experience, best-of-breed technologies, and proven migration methodologies and processes to safely move your employees and data to the cloud. We also accelerate time to value by providing an integrated, virtually colocated DXC Technology and Microsoft delivery team that helps to keep your business running and provides rapid incident response and resolution time throughout the implementation process.

Key benefits

- Improve productivity and collaboration from anywhere with enhanced security.
- Leverage the expertise of a trusted partner while mitigating risks to your business.
- Drive employee adoption to accelerate time to value from day 1.

We understand how to work in complex environments, protect critical processes and meet tight timelines. Our results-driven approach improves services, reduces risk and helps businesses realize significant cost savings.
