

Intelligent, convenient choices enhance user support

DXC IT Vending Solution

Get easy access to IT peripherals, accessories and other key supplies — anytime.

Benefits

- Maximized user productivity with instant access to a self-service solution
- Enhanced user experience with reliable controls and approvals in place to manage and report on use
- Integrated approval, billing and inventory fulfillment

Instant fulfillment

The process you use to supply simple IT peripherals to your employees can often be complicated, involving a requisition ticket submission, a call ticket creation, an order to be processed, and a delivery made.

DXC Technology offers a way to completely automate that process. The DXC IT Vending Solution not only gives your employees instant access to the equipment they need on a daily basis, it also tracks those products to enable 100 percent accuracy with respect to billing and inventory fulfillment.

Our solution is completely customizable to your specific needs. No matter what your objective — whether it's improving delivery time, centralizing billing or having a tangible point-of-use design — this solution enhances the way you distribute IT peripherals.

Effortless delivery

Enjoy a turnkey solution designed to maximize the efficiency of your desktop delivery model. It gives your employees 24x7 access to critical parts necessary for their work. You decide what to make available; we manage the inventory.

Simple control

Maximize efficiency by giving your employees the convenience they desire to quickly replace or acquire IT peripherals, without sacrificing control over the process. You establish permissions and product selection, and get detailed consumption reporting and tracking that enable you to understand usage, spending and trends.

Improved efficiency

- Receive complete project management and ongoing customer support throughout the life of each peripheral, beginning with installation and including onsite hardware and software training.
- Ensure 24x7 access to the products your workforce needs.
- Reduce waste by limiting and restricting items based on employee need and function.
- Improve invoicing accuracy by automating the entire transaction process.
- Limit downtime from employees unable to complete daily tasks while waiting on IT products.

- Limit resources tied up in on-hand inventory with a solution that includes automatic product reordering.
- Streamline the purchasing process with software that integrates into your platform.
- Get additional locker options for larger items such as laptops, batteries and other important IT products.

Meaningful outcomes

As technology evolves, companies seek more efficient ways to manage functions throughout their business. What should be a simple task of providing IT peripherals to your employees is often cumbersome.

Our clients deploy DXC IT Vending Solution for a variety of reasons. So we design it to work best for your specific needs, including reducing downtime and the number of steps it takes to purchase an IT peripheral.

Complete solution from an IT industry leader

- Custom-built equipment, designed specifically for each installation
- Industry leader in offering full implementation, maintenance and service
- Global presence with constantly expanding service footprint, enabling you to deploy machines in every office where there is a need and a benefit
- The ability to set up customized reporting templates, so you can see the exact data that benefits your business
