Key industries

- Healthcare & Life Sciences

- Travel & Transportation

- Banking & Capital Markets

- Manufacturing

- Public Sector

- Consumer Industries & Retail

- Energy

- Communications, Media & Entertainment

Moving your organization to Microsoft Office 365 can deliver huge benefits. This cloud-based subscription service combines many of Microsoft's most popular applications — Excel and Outlook among them — with the company's powerful cloud services, including OneDrive and Teams.

With Office 365 installed, all authorized users in your organization can create files, share data and collaborate from anywhere in the world, using any device. And they can do so easily and securely.

But moving to Office 365 can also present serious challenges. For most organizations, the transition will require significant planning and user preparation. All that means more risk.

DXC Technology has created a one-day, in-person workshop to help you and your organization move faster and smarter to Office 365.

With the DXC Detailed Deployment Planning Workshop for Office 365, you and your team will learn how to develop an Office 365 transition plan that steers around the biggest risks. You'll gain valuable insights into the true cost and time of your Office 365 journey.

Workshop timeline and deliverables

While the workshop takes place during a single day, you receive three distinct elements: pre-workshop planning, the workshop itself and post-workshop deliverables.

Before the day of your Detailed Deployment Planning Workshop for Office 365, you'll meet remotely with DXC experts. Together, we'll customize the workshop to meet your organization's specific needs.

Then, on the day of the in-person workshop, DXC experts will work with your team to validate the information and dive deeper into your organization's Office 365 transformation journey.

Shortly after your workshop is completed, DXC will analyze the results and provide you with an extensive list of Office 365 deliverables, including:

- High-level Office 365 implementation plan, documented in a customized Integrated Transition Transformation Plan (ITTP)

- High-level roles and responsibilities, also documented in the customized ITTP

- Potential roadblocks existing in your current and future environments, delivered as a Watch Points list

- Consolidated descriptions of current and future modes of operations, provided in a high-level design document

- Your complete transition and transformation pricing

Workshop features

DXC's Detailed Deployment Planning Workshop for Office 365 can be held either at one of your organization's locations or at a DXC site; it's your choice.

On the day of the workshop, DXC experts will work with your Office 365 transition team to:

- Review your organization's business requirements and future needs
- Identify any planned projects that could affect your transition to Office 365
- Assess the risk of other potential roadblocks and watch points
- Develop a high-level timeline and cost estimate for your organization's specific Office 365 workload

You can trust DXC

DXC is the world's leading independent, end-to-end IT services company. We help more than 6,000 clients around the world — including some of the best-known brands in nearly every industry — harness the power of innovation for digital transformation. And we've been managing email and collaboration workloads for more than 25 years.

When it comes to Microsoft Office 365 and other software products and services,

DXC is a world-class leader. We have over 20,000 Microsoft-trained professionals on staff. In addition, DXC supports more than 45 million mailboxes and manages more than 1 million seats running Microsoft's SharePoint team-collaboration software.

You can also benefit from DXC's experience helping other organizations move to Office 365. For instance, we recently helped a global IT company migrate to Office 365 Enterprise and reduce its cost per mailbox by 17 percent — and we put in place steps to reduce that cost per mailbox further, to nearly 30 percent. We also helped a 100-year-old engineering procurement and construction company move its entire global workforce to Office 365 for a competitive advantage — a big step toward its goal of doubling revenue by 2020.

All this gives us — and, by extension, you — exceptional insight into Office 365's architecture and operations. It also helps us develop and deliver to you proven migration methodologies and processes to move your users swiftly and safely to the Microsoft cloud. You can benefit from a faster time to value from your Office 365 investment. And should you experience a disruption, you can

benefit from a rapid incident response and resolution provided by the co-located DXC and Microsoft delivery team.

It's time to get started

Now's the time to jump-start your Office 365 transition with help from DXC. Start with DXC's Office 365 Advisory Services. You'll identify business value, examine and gain visibility into your current state, balance demand between your strategic and tactical initiatives, and set priorities to discover and explore the possibilities.

Then follow up with DXC's Detailed Deployment Planning Workshop for Office 365. You'll get your plan rolling so that you can start moving your business to Office 365 with less risk, more upside and a faster return on investment.
