

DXC MyWorkStyle™

Digital workplace solutions

Create an intelligent, digitally connected workplace experience

Empower employees with a consumer-like digital workplace experience that allows employees to work the way they want to — anytime, anywhere and on any device.

Advances in technology, skilled-labor shortages, lack of employee engagement, increased competition and changes in consumer behavior are accelerating the pace of change in the workplace.

60%

of organizations believe that a strategy for artificial intelligence is urgent for their business, can help drive workplace efficiency and collaboration, and create a more appealing work environment²

21%

additional profit generated from engaged teams over their disengaged counterparts³

Traditional notions of work and the workplace are changing rapidly, driven by the growth of remote, mobile and gig workforce models. Consumer and technology trends in automation, analytics, internet of things (IoT) and augmented/virtual reality are driving efficiencies and raising worker expectations. A shortage of labor and skilled talent is increasing competition for workers.

In addition, global workforce demographics are shifting, with millennials and Gen Z expected to make up 58 percent of the global workforce in this decade.¹ More than ever before, this younger generation of workers values flexibility and a positive working environment. Without a collaborative, congenial company culture, they are likely to eventually check out mentally or even quit — and this disengagement is costing businesses unrealized revenues and productivity.

All of these trends have a profound and disruptive impact on the workplace and the future of work, accelerating the pace of change and requiring business leaders and IT departments to reimagine systems, processes, applications and workforce models. What's more, the gig economy, increased mobility, and cloud and flexible work environments have created a renewed focus on security to protect corporate IP and data.

In today's digital age, businesses must facilitate new ways of working, communicating and collaborating to improve business outcomes, effectively secure data and attract, engage and retain the best talent. Organizations that do not adapt run the risk of being left behind by more agile competitors.

The solution

Harness the power of invisible IT to increase automation and create better employee experiences

DXC Technology delivers an intuitive and agile digital workplace experience that accommodates the fluidity of people and jobs.

DXC MyWorkStyle™ is an innovative, employee-centric set of digital workplace services. DXC provides a personalized, consumer-like digital workplace experience to help enterprises keep pace with a fast-changing market, increase employee satisfaction, attract and retain employees, and drive productivity. We can help you:

- **Save valuable time and resources by automating IT support and streamlining tasks.** The proactive and predictive capabilities of artificial intelligence and machine learning can resolve issues, often without disrupting the employee experience.
- **Support remote, mobile and gig workforce models.** Enable your multigenerational workforce to work the way they want — anytime, anywhere and on any device. Deliver mobile-first, cloud-first capabilities to allow employees to move between devices, applications and work environments, quickly and easily.
- **Drive employee engagement and productivity.** Our digital and immersive experiences enable new ways of working, connecting and communicating, leveraging the latest technologies and applications. DXC MyWorkStyle provides engaging digital experiences, streamlines workloads and increases collaboration.

Workplace modernization simplifies IT complexity and drives innovation.

DXC helps enterprises thrive on change and extend the benefits of workplace modernization across the organization.

reduction

in support costs with DXC digital support

► Digital Support Services

Provide a broad set of innovative digital support services, using automation, analytics, and artificial intelligence (AI), so employees can stay focused and engaged. We enable self-service and do-it-yourself (DIY) capabilities plus proactive and predictive analytics that automatically fix issues before they arise — often without disruption to the employee experience. Have a technician dispatched or provide face-to-face interaction in a DXC walk-in support center.

► Mobility and Workplace IoT

Deliver next-generation digital capabilities with mobile, augmented and virtual reality technologies to provide new ways of working, training and knowledge sharing. Leverage workplace IoT to address industry-specific challenges, build smart connected operations and location-based services, increase automation and improve worker safety.

► Modern Device Management

Easily switch between devices with seamless, secure access to context, information and applications. Improve the employee experience through modern device management, virtual desktop and application services, and device as a service (DaaS). Our modern, digital approach provides the required control, security and compliance with a scalable, as-a-service model.

► Intelligent Collaboration

Foster innovation and collaboration by providing the latest platforms and applications. Remove the frustration many employees experience with new collaboration tools due to lack of training and support. At DXC, we provide strong change management to drive employee engagement, productivity and effective use of tools.
